Breg IMPACT[®]

Breg Impact is a customized DMEPOS/bracing program that streamlines medical equipment delivery and support. Combining clinically trained consultants with integrated workflow software, it creates a paperless, efficient process that reduces costs, improves outcomes, and enhances the patient experience. By simplifying bracing with seamless integration, Breg Impact ensures better clinical alignment and operational efficiency for healthcare providers.

Breg Impact[®]

Solution Design Experts Simplifying DMEPOS Programs.

Customized Solutions: Get personalized programs, designed by clinically trained consultants, tailored to your practice's unique needs and goals.

Expert Guidance: Leverage the expertise and insight of healthcare professionals with deep industry knowledge to help your practice stay ahead and thrive.

Integrated Workflow Software: Enhance efficiency and compliance with Breg Vision, our cutting-edge DMEPOS management software that streamlines operations and supports seamless workflows.

Proven Results: Drive profitability, enhance patient outcomes, and navigate regulatory requirements with confidence.

Comprehensive Support: From effortless program setup to ongoing optimization, we're dedicated to supporting your success every step of the way.

Our team of clinically trained consultants will ensure your DMEPOS program is built on a solid foundation that includes...

Comprehensive practice analysis

Expense and revenue projections

Customized documentation

Coding and billing experience

Process workflow

Continuous improvement

Powerful Benefits

Efficient workflows

Improved profitability

Enhanced patient satisfaction

Breg Vision[®]

Breg Vision is our secure, integrated DMEPOS management software that automates and optimizes time-intensive, manual processes to maximize efficiency and patient care.

Features

Industry-Leading Integrations:

- Bidirectional EMR interface
- ERP integrations

Boosted Productivity:

- Advanced reporting
- End-to-end paperless process
- Sophisticated inventory management
- Tracking and shipping notification

Supported Compliance*:

- Electronic signature capture
- Same or Similar checks
- Eligibility and Benefits verification
- Estimated out-of-pocket patient costs
- Required documentation capture
- Embedded ABN
- Competitive Bid

Optimized Security:

- Multi-Factor Authentication
- Single Sign-On
- Offline Mode
- Advanced Password Complexity
- Successful Completion of SOC 2[®] Examination

■ Breg Vision Clarity™

- Real-time insurance checks and estimated out-of-pocket patient costs for DME now available in Breg Vision!
- Improve patient satisfaction with up-front cost transparency
- Improve administrative efficiency and protect your finances

The value of Breg Vision Clarity

Accurate Cost Estimates:

- Provide patients with clear, upfront information about their costs, giving them peace of mind while enhancing transparency, and fostering trust and satisfaction.

Instant Insurance Verification:

- Quickly confirm insurance coverage to avoid delays and inaccuracies in patient billing.

Increased Efficiency & Confidence:

- Simplify your workflow with automated insurance and cost calculations, boosting staff confidence, reducing administrative costs, and minimizing errors.

Industry-Leading Innovation & Support:

- Leverage Breg's commitment to the latest technologies and continuous improvement for superior DME management, with three dedicated support teams, for fast help when you need it most. We believe that all customers deserve dedicated support.

■ In-House Bracing Program

Provides high-quality products to patients on demand while **keeping the revenue within the system.**

HME or clinic purchases Breg DMEPOS products

Clinical staff prescribes and provides DMEPOS products to patients on demand

Clinic or HME uses Breg Vision to gather necessary patient information and documentation

Clinic or HME handles billing of DMEPOS products to insurance

HME or clinic collects reimbursement/ancillary revenue

- Generates an **average of \$83,000 in revenue** per orthopedic surgeon, per year, resulting in \$40,000-\$50,000 in profit.**
- **100% continuity of patient care** by taking control of DME in-house. Patients get exactly what they need, when they need it, from your own team.
- **Streamlines workflows and inventory management** through Vision patient management software that integrates directly with your EHR/EMR and ERP systems.

■ Outsourced Inventory Program (Stock and Bill)

Provides high quality products to patients on demand **without incurring the cost of purchasing DMEPOS inventory.**

- Reduces the cost of having inventory on hand by dispensing Breg owned inventory. Breg **saved our outsourced program customers \$25.8 million in products costs and reduced their inventory carry cost by \$29 million****
- **Enhances patient experience** by providing bracing products on demand. Breg serves more than five million patients per year.
- **Streamlines workflows and inventory management** through Vision patient management software that integrates directly with your EHR/EMR and ERP systems.

■ Using Both Programs Together

Many customers use both of our programs to accommodate different parts of their business.

The **In-House and Outsourced programs can work differently for various divisions** within your facility; for example:

- An Orthopedic department wants to use Breg Impact's In-House Billing Program, as they are staffed to manage the billing and insurance process and have the ability to capture the ancillary revenue.
- The Emergency Department, however, needs to focus on simplicity and streamlined patient care. They don't have dedicated employees to process billing internally, so the Outsourced Billing Program is a better fit within their existing workflow.

Our mission is to simplify and elevate orthopedic patient care by delivering high quality products and comprehensive partnerships. **Let us help you find a Breg Impact solution that helps you elevate patient care.**

***DISCLAIMER: GENERAL EDUCATIONAL INFORMATION ONLY: NOT LEGAL, MEDICAL OR CLAIM SUBMISSION ADVICE. FINAL RESPONSIBILITY TO DETERMINE CLAIM AND BILLING REQUIREMENTS RESTS WITH THE PROVIDER SUBMITTING THE CLAIM. REIMBURSEMENT REQUIREMENTS VARY. INFORMATION SUBJECT TO CHANGE WITHOUT NOTICE. CONSULT WITH YOUR HEALTH REGULATORY COUNSEL AND/OR A CERTIFIED BILLING PROFESSIONAL..**

****Data on file. Results can vary based on physician specialty and product utilization.**

Cold Therapy and DVT Prevention

Product Pictured:

Polar Care Wave®

The Polar Care Wave combines motorized cold therapy and active compression in a compact, easy-to-use system. It's portable, so you can use it at home or in clinical settings. Designed to reduce pain and swelling, it offers customizable treatment with adjustable cold and compression settings for personalized care.

Polar Care Wave®

Polar Care Wave combines motorized cold therapy with active compression in a simple and compact system, making it ideal for both facility and home use. Polar Care Wave is easily transported from the hospital, physical therapy clinic or athletic training room to the patient's home, extending the benefits of cold and compression.

Polar Care Wave is designed to reduce pain and edema to optimize patient recovery. Federal law restricts this device to sale by or on the order of a licensed health care practitioner.

Simple

- Single patient use facility-to-home unit
- Remarkably easy to operate
- No additional barrier needed
- Ice bags included for an easier way to refill system

Customizable

- Varied levels of cold + compression settings
- Y-adapter for bilateral usage
- Multiple pad configurations

Convenient

- Compact design facilitates transport
- System alone and system/pad combos available
- Hose-management storage system
- Whisper quiet pump technology encourages rest and recovery

Quality

- High-quality Breg Cold Compression Pads
- Class II 510(k) clearance

■ Polar Care® Kodiak®

The Polar Care Kodiak Cold Therapy System is a convenient and versatile offering in Breg's Polar Care line. Its easy-to-use, compact design makes it great for clinic, hospital, and home use. With the addition of a little ice and water, your patients will enjoy optimal cooling temperature lasting up to 6 hours. Breg ensures your patients can enjoy the benefits of cold therapy anywhere with the Polar Care Kodiak's optional battery pack accessory. Each battery pack comes with four replaceable AA batteries ready to power 10-14 hours of motorized cold therapy. The revolutionary Intelli-Flo® pads specify temperature to each treatment area. Proper use requires an insulation barrier between the Intelli-Flo pad and the patient's skin. Federal law restricts this device to sale by or on the order of a licensed health care practitioner.

Common Examples of Use

- Post-operative
- Arthroscopic procedures
- Reconstructive procedures
- General surgery
- Post trauma
- Chronic pain
- Physical therapy

Features

- Physicians and patients benefit from reduced pain and swelling—follow-up visits focus on recovery, rather than pain management
- Whisper-quiet pump technology allows patients to rest and recover in comfort
- Durable, powerful construction provides peace of mind
- Battery Pack option for patients on the go
- Intelli-Flo Pad technology meets the unique demands of the treatment area
- Sterile Dressings available for each part

Intelli-Flo® Pads

These revolutionary pads offer temperature specific to each treatment area, allowing for consistent cold delivery. The ergonomic design provides exceptional coverage, static compression, and patient comfort. Intelli-Flo Pads are compatible with Polar Care Kodiak only. Proper use requires an insulation barrier between the Intelli-Flo Pads and the patient's skin. The water impermeable Sterile Polar Dressings offered by Breg provide an appropriate and complete barrier between the pad and the patient's skin.

■ Polar Care Glacier™

The Polar Care Glacier Cold Therapy System balances the needs of the patient and the clinician. Its easy-to-use, feature-rich design makes it a great choice for hospital use. With the addition of ice and water, your patients will enjoy up to 13 hours of cold therapy. Proper use requires an insulation barrier between the pad and the patient's skin. Federal law restricts this device to sale by or on the order of a medical professional.

Common Examples of Use

- Post-operative
- Arthroscopic procedures
- Reconstructive procedures
- General surgery
- Post trauma
- Chronic pain
- Physical therapy

Features

- Once-a-shift fill requirement increases a hospital's efficiency—8hr shifts? 12hr shifts? The Glacier has them covered
- Physicians and patients benefit from reduced pain and swelling—follow-up visits focus on recovery, rather than pain management
- Whisper-quiet pump technology allows patients to rest and recover in comfort
- Temperature control dial allows for individualized protocol
- Broad selection of premium WrapOn Pads conform to the affected area
- Sterile Polar Dressings available for each part

Polar Care Packs

Breg's Polar Care Pack line is a complete line of gel pack products with wraps for the ankle, knee, hip, and shoulder. The premium gel packs are vacuum packed, so the gel stays evenly distributed and pliable at standard freezer temperatures. These unique gel packs are specifically formulated to provide cold therapy for more than two hours. Each wrap features elastic straps that provide static compression while holding the gel packs firmly in place. The Polar Care Pack line is an excellent addition to your motorized cold therapy protocol.

Soft Stuff

Soft Stuff gel wraps stay cold for 45-60 minutes. Times will vary depending upon size of the patient, the environment and temperature of the freezer.

Features

- Always pliable regardless of the application
- Uses latex-free elastic straps
- All the straps are 3" (8cm) wide, spreading the pressure over a wide area
- The straps that come with the universal knee/shoulder allow the specific pad to be used comfortably on both the knee and shoulder
- All ingredients inside Soft Stuff are food grade products. If there ever was a leak in the nylon bag that holds the cold solution, it would not be a safety or health hazard

DVT Guardian

The DVT Guardian is your ideal Deep Vein Thrombosis (DVT) prevention partner for a safe and comfortable recovery at home or in a clinical setting. The innovative device uses dual-chamber compression to enhance blood circulation and aid in the prevention of DVT. With preset pressure cycles that simulate muscle contractions, the DVT Guardian offers up to 20 hours of operation on a single battery charge. Its portable, rechargeable design ensures you receive consistent protection.

Features

- Dual-Chamber Compression
- One-Touch Operation
- Easy-To-Read Display
- Cordless and Portable
- Customized Fit with Trimmable Cuff
- Up to 20 Hours Battery Life
- Lightweight Wrap
- Adjustable Hook and Loop Straps

Post-Op Knee Bracing

Product Pictured:

T Scope® Premier Post-Op Knee Brace

The T Scope Premier Post-Op Knee Brace offers comfort, support, and controlled range of motion for knee rehabilitation. Ideal for post-surgery recovery or injury management, its trusted telescoping design has been used by healthcare professionals for years to promote healing and restore mobility.

T Scope® Premier Post-Op Knee Brace

The T Scope Premier Post-Op knee brace delivers a patient-centric design for unprecedented comfort, simplicity, and support during post-operative knee rehabilitation. The brace is designed to provide protected, controlled range-of-motion (ROM) for patients recovering from knee surgery or those who have knee injuries or instabilities. It's based on the same innovative telescoping design of the original T Scope, which medical professionals have used for years.

Common Examples of Use

- Locked or limited motion control
- Post-op rehabilitation
- Soft tissue injuries of the knee
- ACL, PCL, MCL, LCL repairs / injuries
- Tibial plateau fractures
- Osteochondral repairs
- Meniscal repairs
- Patella tendon repairs
- Condylar fractures
- Sprains / strains of the knee
- HTOs (High Tibial Osteotomy)
- Stable or internally fixed fractures of the knee

Features

- Easy-to-use ROM hinge with quick-adjusting flexion / extension stops to control and limit knee flexion and extension
- Telescoping calf and thigh sleeves for sizing a wide range of patients from 5' to 6'4" (152.4 - 193.04 cm) tall (brace extends from 17" to 27" (43 - 69cm))
- BridgeTech Incision pad relieves pressure and provides added comfort around the incision site (optional accessory)
- Comfortable padding throughout the brace, designed with patient compliance in mind
- Brace is lightweight, weighing less than 35 oz (standard version)
- Accommodates both right and left leg procedures, reducing the need to stock additional products

BridgeTech incision pad

08814	T Scope Premier 17" - 27" / (43 - 69 cm), fits up to a 30.5" (77 cm) thigh, Universal Right or Left

Recover Knee Brace

The Recover Knee brace combines the low profile nature of a hinged ligament knee brace with the functionality of a post-operative brace. This product is available in wraparound style in both long and short lengths. The wraparound design allows patients to apply the brace with ease and with the options of Airmesh® or Neoprene, patients can choose the material that best meets their needs. The Recover Knee brace utilizes the patented T Scope user-friendly hinge, which offers range of motion control of the knee with simple, quick adjustments. The universal design accommodates both right and left leg procedures. The Recover Knee brace combines ease of use, comfort, and functionality all in one brace.

Common Examples of Use

- Locked or limited motion control
- Post-op rehabilitation
- Soft tissue injuries of the knee
- ACL, PCL, MCL, LCL repairs / injuries
- Tibial plateau fractures
- Osteochondral repairs
- Meniscal repairs
- Patella tendon repairs
- Condylar fractures
- Sprains / strains of the knee
- HTOs (High Tibial Osteotomy)
- Stable or internally fixed fractures of the knee

Features

- T Scope hinge offers extension adjustability between -10° and 70°, while flexion may be adjusted between -10° and 120°
- Easy to use extension drop lock allows the brace to be locked out in five positions (-10°, 0°, 10°, 20°, and 30°) of knee extension with the push of a button
- Wraparound design for easy application
- Universal fit for a right or left leg to reduce inventory
- Open back design to ensure no bunching or pinching of the popliteal crease of the knee
- Available in Airmesh or Neoprene

G3 Knee Brace

Post-operative brace with convenient slide tabs for easy adjustment. Universal sizing to accommodate a wide variety of patients. The adjustable paddles on the G3 brace allow the clinician to customize the position where the straps capture the leg. This provides enhanced patient comfort by eliminating pressure on the incision sites.

Common Examples of Use

- Post-op rehabilitation
- ACL, PCL, MCL, LCL repairs / injuries
- Tibial plateau fractures
- Osteochondral repairs
- Meniscal repairs
- Patella tendon repairs
- Condylar fractures
- Sprains / strains of the knee
- HTOs (High Tibial Osteotomy)
- Stable or internally fixed fractures of the knee

Features

- One size adjusts from 18" to 26" (46 - 66 cm) in half-inch increments
- Anti-migration gastroc strap
- Full range-of-motion hinge adjustable from -10° to 110°
- Full foam and cool versions
- Extends to malleolus with double-padded ankle plate for maximum suspension
- Straps are adjustable to accommodate surgical incision site
- Quick release buckles for ease of application

G3 XL Extended Knee Brace

The G3 XL Extended has similar features as the G3 with an additional 2" (5 cm) in length and with 4" (10 cm) longer straps. The brace is designed with an anatomically correct malleolus plate to contour to the ankle for brace suspension. Universal sizing accommodates a wide variety of patients.

Common Examples of Use

- Post-op rehabilitation
- ACL, PCL, MCL, LCL repairs / injuries
- Tibial plateau fractures
- Osteochondral repairs
- Meniscal repairs
- Patella tendon repairs
- Condylar fractures
- Sprains / strains of the knee
- HTOs (High Tibial Osteotomy)
- Stable or internally fixed fractures of the knee

Features

- Range of motion hinge from -10° to 110° with 10° increments
- Adjustable straps to accommodate surgical incision sites
- Contoured malleolar plate for patient comfort around the ankle
- Anti-migration gastroc strap
- Quick release buckles for ease of application
- One size adjusts from 20" to 28" (51 - 71 cm) in half inch increments
- Drop lock

■ Post-Op Knee Brace

The upper and lower hinge bars on the Post-Op knee brace can be easily contoured or shortened for an optimized fit, and the foam may be trimmed to suit smaller patients. Universally sized for left and right for easy stocking.

Common Examples of Use

- Locked or limited motion control
- Post-op rehabilitation
- Soft tissue injuries of the knee
- ACL, PCL, MCL, LCL repairs / injuries
- Tibial plateau fractures
- Osteochondral repairs
- Meniscal repairs
- Patella tendon repairs
- Condylar fractures
- Sprains / strains of the knee
- HTOs (High Tibial Osteotomy)
- Stable or internally fixed fractures of the knee

Features

- Full foam for compression and warmth
- Spring loaded flexion / extension stops for easy range of motion from 0° - 120°
- Ability to lock out in full extension
- Scored anodized bars break down to post-op rehab length
- Quick Lock offers ability to lock out brace from -10° to 30° (with increments of 10°)

Knee Ligament Bracing

Product Pictured:

Z12[®] Dynamic Knee Brace

The Breg Z12 Dynamic Knee Brace is designed to provide exceptional support and stability for patients recovering from ligament injuries while allowing for natural movement during daily activities and non-contact sports. Weighing just 14 oz (0.4 kg), it is one of the lightest braces on the market, making it ideal for individuals who require support without sacrificing comfort or mobility.

Fusion® Technology

Fusion's sleek frame is made of lightweight, high-strength aluminum, making it extremely low profile. Fusion braces feature a strong yet flexible polymer that allows the brace to conform to the shape of the leg (Figure A, highlighted in blue), resulting in a precise, contoured fit. With proper strapping the flexible polymer goes into tension upon valgus load. This allows the brace to engage sooner, to help resist knee displacement (Figure B). The flexible polymer technology also helps the brace accommodate the changing axis of the knee, keeping the brace solidly in place.

Improved Comfort and Fit with AirTech® Innovation

AirTech was specifically designed to improve comfort and fit. AirTech is a complete system of airmesh vents and grooved channel frame pads that increase airflow throughout the brace. The system allows cool air in and moves warm air and moisture away from the skin, improving patient comfort. The pad technology also improves suspension, reduces pinching and helps alleviate pressure points.

Figure A

Figure B

Fusion Knee Brace

Fusion provides patients with protection for the ACL, PCL and collateral ligaments. It's ideal for normal daily activities as well as athletic endeavors. This brace is designed using a flexible polymer, which creates a comfortable, precise fit that won't compromise mobility and helps to align and support the knee.

Common Examples of Use

- ACL and/or PCL deficiencies or reconstructions
- MCL and/or PCL deficiencies or sprains

Features

- AirTech Frame pads - innovative windows and channels in the pad permit cooling air flow while allowing moisture and heat to move away from the skin
- Pivot Point Strap tabs - pivoting strap tabs allow straps to contour to the leg for enhanced fit, comfort and suspension
- Medial side structure, designed for contoured fit and protection

Brace length starts at 13.5" (34 cm) and varies by size.

Fusion Women's Knee Brace

Fusion Women's provides patients with protection for the ACL, PCL and collateral ligaments. It's ideal for normal daily activities as well as athletic endeavors. This brace is designed using a flexible polymer, which creates a comfortable, precise fit that won't compromise mobility and helps to align and support the knee.

Common Examples of Use

- ACL and/or PCL deficiencies or reconstructions
- MCL and/or PCL deficiencies or sprains

Features

- AirTech Frame pads - innovative windows and channels in the pad permit cooling air flow while allowing moisture and heat to move away from the skin
- Pivot Point Strap tabs - pivoting strap tabs allow straps to contour to the leg for fit, comfort and suspension
- Medial side structure, redesigned for contoured fit and protection
- Low profile, lightweight, contoured design specifically for women

Fusion XT Knee Brace

Fusion XT provides patients with protection for the ACL, PCL, and collateral ligaments. By combining a high-strength frame design with lightweight, aircraft-grade tempered aluminum, Fusion XT delivers high performance for the rigors of contact activities.

Common Examples of Use

- ACL and/or PCL deficiencies or reconstructions
- MCL and/or PCL deficiencies or sprains

Features

- Lightweight, high-strength aluminum
- AirTech frame pads - innovative windows and channels in the pad permit cooling air flow while allowing moisture and heat to move away from the skin
- Pivot Point Strap tabs - pivoting strap tabs allow straps to contour to the leg for fit, comfort and suspension
- Medial side structure, now redesigned for contoured fit and protection

Dynamic Ligament Bracing

What is Dynamic Ligament Bracing?

Dynamic ligament braces use movement and muscle power to apply a corrective force during the time of medical need, to help control the tibia and stabilize the knee joint. This force is then removed when no need exists as the leg moves into flexion. The brace works with the body to control the tibia from moving out of proper alignment with the femur. Dynamic bracing can be used for multiple types of ligament instability. Whether competing at the highest level of sport or lacing up for the weekend, patients will have the support they need to perform.

Reducing the Symptoms of Ligament Injuries

ACL Injuries

When an ACL is torn or otherwise injured, control of the tibia has no defined end point, causing knee instability. As a result, a major issue when suffering from an ACL injury is the time it takes for the hamstrings to activate as the tibia moves into extension. In an ACL-D knee and even in a reconstructed ACL, the hamstring response time is slowed by 2 - 3 times that of a healthy knee. This means that the hamstrings are ineffective in controlling the movement of the tibia as the leg moves into the final degrees of extension. As a result, just before the foot hits the ground, in the last 30 degrees of extension, the tibia naturally wants to move anteriorly and sublux causing knee instability. With a dynamic ligament brace, a counterforce is applied to the front of the tibia during the last 30 degrees of extension. This counterforce keeps the tibia in proper alignment as the foot hits the ground providing increased knee stability.

PCL Injuries

When the PCL is torn or injured, as the knee moves further into flexion, the tibia naturally wants to move posteriorly. The dynamic brace uses the quadriceps and hamstrings power to work against the pathological movement of the tibia by applying a counterforce at 50 - 60 degrees of flexion to the back of the tibia, keeping the knee joint in proper alignment.

Z-12® D Knee Brace

The Z-12 D provides dynamic technology in a lightweight brace ideal for patients of shorter stature. Featuring the unique hinge-to-strapping system in a dual upright frame, the Z-12 D provides dynamic control of tibial translation. The frame contains spring steel reinforcement for extra shell strength.

Common Examples of Use

- Knee ligament injuries / deficiencies
- Prophylactic

Features

- Dynamic control system to reduce tibial translation

- Pivoting gastroc strap design helps minimize brace migration
- Quick-release buckles for easy application
- Sport model available with Hi-Activity pads and D-rings
- Hi-Activity pads feature an extra-grip material to assist in fit and suspension for impact activities

Axiom-D Elite Ligament Knee Brace

The Axiom-D Elite's unique dynamic hinge delivers innovation for ligament bracing. The unique dynamic hinge delivers a progressive counterforce to the lower leg to reduce tibial translation in patients with ligament deficiencies or recovering from ligament reconstruction. This maintains the proper anatomic relationship between the femur and tibia as it goes through a full range of motion. The Axiom-D Elite used for PCL* and is rigid, durable and comfortable, providing full-bodied support and protection. It is available in a dual upright 16" (40.6 cm) frame for robust and extended support. The redesigned low profile brace contours to the leg and is offered in aluminum or magnesium, with multiple configurations for customization. Standard Fit, Athletic Cut or Custom Manufacture, the Axiom-D Elite is a knee brace as demanding as the patient requires it to be. Whether they are competing in contact sports or playing as a weekend warrior, your patients are supported for a full range of activities.

Z-12 Knee Brace

Weighing in at 14 oz (4 kg), our Z-12 brace is one of the lightest on the market. The low-profile Z12 has a prefabricated magnesium frame and is for patients requiring support and stability following ligament injuries. The Z12 is not recommended for contact sports.

Common Examples of Use

- Knee ligament injuries / deficiencies
- Prophylactic
- Quick-release buckles ease application
- Low-profile and lightweight
- Sport model available with Hi-Activity pads and D-rings
- Hi-Activity pads feature an extra-grip material to assist in fit and suspension for impact activities

Features

- Pivoting gastroc strap design helps minimize brace migration

Z13 Knee Brace

The Z13 provides the same low-profile design as the Z12 with the strength of aluminum. Can be modified in the field for a more customized fit.

Common Examples of Use

- Knee ligament injuries / deficiencies
- Prophylactic

Features

- Pivoting gastroc strap design helps minimize brace migration

- D-rings keep straps flush against the brace during activities
- Not available as a custom brace
- Sport model available with Hi activity pads and D-rings
- Hi Activity pads feature an extra-grip material to assist in fit and suspension for impact activities

X2K and Compact X2K Knee Brace

X2K is designed to provide patients with optimal valgus and varus support. It is offered in both standard and compact frames, the Compact X2K frame is slightly shorter in overall length, providing a more proportional and comfortable fit for patients 5'6" and under.

Common Examples of Use

- ACL
- PCL
- Collateral ligament protection

Features

- Diamond design for optimal varus and valgus stiffness
- Patented adjustable hinges for reduced migration
- Internally mounted straps for ideal brace suspension

Undersleeve

Available in cotton or 1 / 8" Neoprene, these undersleeves fit comfortably under Breg functional braces and are ideal as a barrier for sensitive skin, as well as for soft tissue containment. The undersleeve can help with suspension while wearing our knee braces as well.

Common Examples of Use

- Cotton undersleeve has closed patella (Cotton / Lycra blend - no elastic) (shown)
- Neoprene undersleeve has open patella

Osteoarthritis Bracing

Product Pictured:

Freestyle™ OA Knee Brace

The Breg Freestyle™ OA Knee Brace relieves pressure on the affected area for patients with mild to moderate unicompartamental osteoarthritis. Its easy wraparound design ensures simple application, while breathable materials provide comfortable compression. A low-profile hinge and customizable off-loading with a thumbwheel dial enhance comfort and support. Lightweight and user-friendly, the Freestyle™ OA is ideal for improving knee function and managing OA symptoms.

Fusion OA Plus: Knee Brace Innovation

With its sleek, lightweight design, Fusion OA Plus provides gentle medial or lateral off-loading for unicompartamental osteoarthritis. The hinge utilizes a telescoping condyle with our exclusive, user-friendly thumbwheel dial design that allows patients to easily adjust the level of off-loading without using a tool. The Fusion OA Plus hinge also incorporates an offset gauge with a large viewing window to clearly display the amount of load applied in half millimeter increments.

Improved Comfort and Fit with Airtech® Innovation

Another key feature of the Fusion OA Plus is AirTech, specifically designed to improve comfort and fit. Airtech is a complete system of air mesh vents and grooved channel frame pads that increase airflow throughout the brace. The system allows cool air in and moves warm air and moisture away from the skin, improving comfort. The pad technology also improves suspension, reduces pinching and helps alleviate pressure points. Additionally, since Fusion OA Plus features a flexible polymer, it contours to the leg, providing unhindered mobility, enhanced comfort, and ligament protection. It is ideal for a variety of uses. Fusion OA Plus braces set the standard when it comes to suspension - it just stays where you put it!

Fusion and Freestyle knee braces gently apply pressure to the unaffected side to align the knee and relieve the compressive force on the affected side.

Thumbwheel dial

Thumbwheel dial hinge makes off-loading easy.

Fusion OA Plus Knee Brace

The Fusion OA Plus knee brace provides patients with medial compartment off-loading for unicompartmental osteoarthritis. It features Breg's exclusive adjustable hinge technology, which provides an effective valgus load to the knee. The hinge utilizes Breg's thumbwheel dial design that allows patients to easily adjust the level of offloading without using a tool. The flexible polymer get a personal, contoured fit that keeps the brace in place all day long. Fusion OA Plus provides medial / lateral, anterior / posterior stabilization and support.

Common Examples of Use

- Unicompartmental OA-medial
- Chondral defect procedures
- Meniscal procedures

Features

- AirTech frame pad
- Thumbwheel dial hinge for easy off-loading
- Contoured fit and protection
- Low profile, lightweight, contoured design
- Enhanced comfort with foam condyle pads, cushioned straps, and frame pads for all day support

Fusion XT OA Plus Knee Brace

Fusion XT OA Plus is designed for medial OA patients who participate in high-impact activities. This brace features a high-strength frame that utilizes Breg's standard adjustable hinge design for maximum durability.

Note: Fusion XT OA Plus requires the use of a hex key (included) for off-loading adjustments.

Common Examples of Use

- Unicompartamental OA-medial
- Chondral defect procedures
- Meniscal procedures

Features

- AirTech frame pads
- Lightweight, high-strength aluminum
- Contoured fit and protection
- Enhanced comfort with foam condyle pads, cushioned straps, and frame pads for all day support
- Easily adjustable / removable straps ensure a proper fit

Fusion Lateral OA Plus Knee Brace

The Fusion Lateral OA Plus brace features a streamlined frame with an innovative, slim thumbwheel dial. Designed to provide lateral off-loading for patients with unicompartmental osteoarthritis. The Fusion Lateral OA Plus incorporates an offset gauge that clearly displays the amount of load applied in half-millimeter increments. It features a flexible polymer, allowing patients to always get a personal, contoured fit that keeps the brace in place all day long.

Common Examples of Use

- Unicompartmental OA lateral
- Chondral defect procedures
- Meniscal procedures

Features

- AirTech frame pads
- Thumbwheel dial makes off-loading adjustments easy
- Contoured fit and protection
- Low profile, lightweight, contoured design
- Enhanced comfort with foam condyle pads, cushioned straps, and frame pads for all day support

Fusion Women's OA Plus Knee Brace

The Fusion Women's OA Plus knee brace provides medial compartment off-loading for patients with unicompartmental osteoarthritis. It features Breg's exclusive adjustable hinge technology, which provides an effective valgus load to the knee. The hinge utilizes Breg's thumbwheel dial design that allows patients to easily adjust the level of offloading without using a tool. A flexible polymer, get a personal, contoured fit that keeps the brace in place all day long. Fusion Women's OA Plus provides necessary medial / lateral, anterior / posterior stabilization and support.

Common Examples of Use

- Unicompartmental OA-medial
- Chondral defect procedures
- Meniscal procedures

Features

- AirTech frame pad
- Thumbwheel dial hinge for easy off-loading
- Contoured fit and protection
- Low profile, lightweight, contoured design specifically for women
- Enhanced comfort with foam condyle pads, cushioned straps, and frame pads for all day support

Solus® Plus Knee Brace

The Solus Plus knee brace provides support and stability for patients with medial compartmental osteoarthritis (OA). Designed for activities of daily living, Solus Plus delivers effective load dispersion to relieve the symptoms of OA. It features Breg's exclusive thumbwheel hinge technology, which provides an effective valgus load to the knee.

Common Examples of Use

- Unicompartamental OA-medial
- Chondral defect procedures
- Meniscal procedures

Features

- AirTech frame pads
- Low profile, single upright hinge for daily living activities
- Thumbwheel dial hinge makes off-loading easy
- Enhanced comfort with foam condyle pads, cushioned straps, and frame pads for all day support

Freestyle™ OA Knee Brace

The Freestyle OA provides off-loading of the medial or lateral compartment for patients with mild to moderate unicompartamental osteoarthritis. The simple wraparound design allows patients to apply and remove the brace with ease. Comfortable, breathable material provides focused compression around the knee joint. The single-sided low profile hinge encourages patient compliance, while the innovative thumbwheel dial allows precision unloading adjustments without the use of a tool.

Common Examples of Use

- Mild unicompartamental osteoarthritis

Features

- Lightweight, low profile brace fits under most clothing

- Soft, comfortable material promotes patient compliance
- Simple, intuitive wraparound design provides compression
- Adjustable off-loading - no tools required
- Finger pockets aid in application
- Medial or lateral options available

*When ordering extension kits for the Freestyle OA Lateral, you will need to order the kit for the opposite leg so the application number sequence matches the brace.

What is Dynamic OA Bracing?

Dynamic OA braces apply a corrective force only when the symptoms of OA are present, while the leg is fully extended. No pressure is applied when the leg is bent, for example, while sitting or driving a car. Dynamic braces are comfortable to wear for extended periods of time.

How do Dynamic OA braces work?

Standard OA braces use corrective forces to align the knee joint. This can reduce the discomfort caused by OA, but the symptoms of OA only occur while weight bearing, when the leg is in extension.

In a dynamic brace, a corrective force is only applied in the last 30 degrees of extension when the most relief is needed. That force is removed as the knee moves into flexion and symptoms are no longer present.

DUO Knee Brace

A unique design, our DUO (Dynamic Unloading Osteoarthritis) brace is the only dual-upright dynamic OA brace on the market. During extension, the hinge on the affected compartment becomes longer while the opposite hinge becomes shorter. This increases the force to unload the affected compartment and relieve pain: when the patient is bearing weight, the brace is actively unloading. DUO reduces force when sitting, making it ideal for patients who need to wear a brace for daily activities.

Common Examples of Use

- Unicompartmental OA
- Unicompartmental OA+ meniscal instabilities with ligamentous injuries

Features

- Low-profile frame
- Dynamic unloading
- Incremental arm adjustments
- Up to 16 degrees of correction
- Unique strapping design that minimizes migration

Z-12 Adjustable OA Knee Brace

This dual upright design features an adjustable condyle building up to an additional 12° of correction into the brace. The Z-12 is for a patient with an active lifestyle who may need additional support from a dual-upright brace due to ligament instability. The adjustable condyle will allow patients to make minor load adjustments by sliding the loading lever through seven settings. The Z-12 frame is made of magnesium, making it our lightest-weight OA brace.

Common Examples of Use

- Unicompartmental OA
- Unicompartmental OA / meniscal instabilities with ligamentous injuries

Features

- Low-profile frame
- Adjustable condyle to increase load adjustment
- Pivoting gastroc strap design helps minimize brace migration
- Up to 12° of correction from condyle pad
- Prefabricated brace color is silver

Z-12 OA Knee Brace

Provides relief from the symptoms of OA while stabilizing the knee and protecting the ACL, PCL, MCL and LCL.

Common Examples of Use

- Unicompartmental OA
- Unicompartmental OA + meniscal instabilities with ligamentous injuries

Features

- Low-profile frame
- Prefabricated version has 3° of correction built into the frame; custom has up to 8° of correction capability
- Unique strapping design minimizes brace migration
- Hi activity pads feature an extra-grip material to assist in fit and suspension for impact activities

Legacy Thruster

The Legacy Thruster is a small, lightweight single-upright brace with the hinge on the affected side of the knee. The straps are pulled to open the joint space and provide relief. This design addresses OA conditions only, not associated with ligament instability.

Common Examples of Use

- Unicompartmental OA
- Meniscal instabilities

Features

- Low-profile frame
- Dial allows incremental force adjustments
- Hinge is on affected side of knee, pulling vs. pushing to help relieve the symptoms of OA
- Unloads in a 4-point load system
- Distal calf section flexes with the muscles of the leg
- Up to 22° of correction can be applied
- For moderate to severe OA patients who require the brace for all-day use

Thruster RLF

Clinically proven to provide pain relief.* This single-upright OA brace provides the greatest amount of OA correction on the market. The unique design of the hinge allows for 36° of brace angulation. This allows the brace to unload knee joints that have excessive tissue. It can be made to unload the medial or lateral compartment of the knee.

Common Examples of Use

- Unicompartmental OA
- Meniscal instabilities

Features

- Hinge is on affected side of knee, pulling vs. pushing to relieve joint pain
- Up to 36° degrees of correction
- Recommended for patients with redundant soft tissue
- Unloads in a 4-point load system

OA Impulse Pull Knee Brace

The soft OA Impulse knee brace is ideal for patients with mild to moderate osteoarthritis (OA) and an active lifestyle. The OA Impulse is designed to give the patient the ability to adjust the amount of OA relief by adjusting the loading hinge, to provide support and compression through Breg's innovative TriTech™ material.

Common Examples of Use

- Unicompartmental OA
- Meniscal instabilities

Features

- Front closure allows easy application and removal
- Internal cuffs distribute load over large area, eliminating pressure points that are common with unloading braces

- Designed for the active patient
- Combines Breg's proven pull technology with our revolutionary TriTech material
- Lightweight, weighing just under 14 oz* (4 kg)
- Adjustable dial - no tools needed
- Not recommended for contact sports such as football, rugby, etc.

*the weight of a medium size brace

Breg Latitude® OA Knee Brace

The Latitude OA knee brace provides off-loading of the medial or lateral compartment for patients with mild to moderate unicompartmental osteoarthritis of the knee. The universal design limits inventory needed to cover the patient size range and allows for the brace to be used for both medial and lateral osteoarthritis.

Common Examples of Use

- Mild to moderate unicompartmental osteoarthritis
- Osteochondral defects
- Articular cartilage defects/repairs

Features

- Single Upright OA brace
- Universal sizing
- Side specific (left or right)
- Offloads either medial OR lateral compartment (with the use of a key)
- Lightweight and low profile
- Easy push button clips and numbered buckles (1-4) for simple and quick application
- Pivoting straps for patient comfort

■ X2K-OA Knee Brace

Breg X2K-OA knee brace is designed for OA patients who are suffering from osteoarthritis of the knee requiring a brace. The brace provides control of varus / valgus forces associated with unicompartmental osteoarthritis of the knee.

Note: X2K-OA knee brace requires the use of a hex key (included) for off-loading adjustments.

Common Examples of Use

- Unicompartmental OA
- Chondral injuries / defect and / or procedures
- Meniscal procedures

Features

- Gel condyle pad, contoured straps, and cushioned enlarged tibia frame pad provide all day comfort, support and suspension
- Enhanced adjustable hinge - 12 mm of travel on both sides
- Retractable opposing hinge feature
- Siliconized strap padding
- Over-sized tibial frame pad

Compact X2K-OA Knee Brace

Offering the same fundamental design as the standard X2K-OA, the Compact X2K-OA frame is slightly shorter in overall length, providing a more proportional and comfortable fit for patients 5'6" and under. (Available in HP = High Performance).

Note: Compact X2K-OA knee brace requires the use of a hex key (included) for off-loading adjustments.

Common Examples of Use

- Unicompartmental OA
- Chondral defect procedures
- Meniscal procedures

Features

- Enhanced adjustable hinge - 12 mm of travel on both sides
- Enhanced comfort with gel condyle pads, cushioned straps, and frame pads for all day comfort
- Silicized strap padding (straps 1 & 2)
- Over-sized tibial frame pad

Soft Knee Bracing

Product Pictured:

CrossRunner™ Knee Brace

The CrossRunner Knee Brace offers the perfect balance of comfort and support. With flexible hinges for stability and natural movement, its lightweight, breathable material provides targeted compression for a snug fit. The ergonomic design ensures comfort for all-day wear, while maintaining stability without restricting mobility, making it an ideal solution for those seeking support and freedom of motion.

CrossRunner™ Knee Brace

The CrossRunner is our new family of soft-hinged knee braces, designed to provide optimal support with maximum comfort in every detail. The perfect cross between comfort and support.

Common Examples of Use

- ACL, PCL, MCL, and LCL injuries and instabilities
- Meniscal instabilities
- Patellar instabilities
- Mild osteoarthritis

Features

- Universal fit to accommodate both left and right knees
- Composed of a hybrid fabric, BreathFit™, that allows for both breathability and compression
- Adjustable range of motion (ROM) control with snap-fit ROM stops
- Durable design of both the sleeve and hinge
- Wraparound version features flaps for a secure fit
- Pull-on version features pull-tabs for easy application

■ Hinged Knee Brace

Ideal for moderate levels of activity, the Hinged Knee Brace provides mild MCL and LCL support in a low-profile design. An adjustable horseshoe buttress can be positioned and trimmed for multiple applications. The front closure (FC) wraparound design allows for the greatest adjustability in fit and is ideal for those with limited flexibility. The FC version does not offer the patellar buttress.

Common Examples of Use

- Sore knee ligaments
- Sprained knee ligaments
- Patella tracking support (not FC)

Features

- Removable polycentric hinges (extension stops available upon request)
- Mesh popliteal for patient comfort
- Adjustable horseshoe buttress

■ Hinged Knee Support

This easy to apply 1/8" neoprene pull-on style brace provides compression and medial/lateral support for mild ligament instabilities.

Common Examples of Use

- Knee sprains
- Knee strains
- Post-op MCL/LCL
- Meniscal repairs

Features

- Available in pull-on or wrap-around styles
- Patella padding for comfort and support
- Removable hinges

Economy Hinged Knee Brace

The Economy Hinged Knee Brace is designed for patients with mild medial / lateral instabilities of the knee and features hinges that are contained in a pocket, making it the brace of choice for wrestling and many other contact activities with low loads. Hinges are removable for maintenance.

Common Examples of Use

- Most ACL, PCL, MCL, LCL injuries and instabilities
- Meniscal injuries
- Mild OA
- Medial (inside) / Lateral (outside of the knee) instabilities

Features

- Available in Airmesh or Neoprene
- Full circumferential straps
- Pull-on and wraparound versions available
- Cost effective method for bracing the knee

Performance Knit Hinged Knee Brace

The Performance Knit Hinged Knee Brace is a lightweight and durable brace providing compression, stability and warmth. It features medial / lateral hinges for stability, a circular buttress for patella control and is constructed using 3-D knitted technology for comfort and breathability. It measures 13" in length for a low profile fit.

Common Examples of Use

- Most ACL, PCL, MCL, LCL injuries and instabilities
- Meniscal injuries
- Mild OA
- Medial (inside) / Lateral (outside of the knee) instabilities

Features

- High quality material provides gentle warmth and compression
- Circle buttress provides patella control
- Medial and lateral hinges for extra stability
- Dual straps provide extra compression and migration control

Part#	Measurement	Size
100398-020	12" - 13.5" (30 - 34 cm)	S
100398-030	13.5" - 15" (34 - 38 cm)	M

■ Hi-Performance Knit Support

The Hi-Performance Knit Support provides compression, warmth, and patella stabilization. It features three-dimensional knitting for a breathable, comfortable fit and a contoured silicone patella donut for support.

Common Examples of Use

- Mild knee sprains
- Chondromalacia
- Mild patellofemoral osteoarthritis
- Osgood-Schlatter disease

Features

- Breathable three-dimensional knit
- Silicone patella donut
- Medial and lateral stays to help prevent migration

Part#	Thigh Circumference	Size

■ Thigh Support

Breg's Thigh Support offers warmth, compression and support for hamstring, quadriceps or groin injuries.

Common Examples of Use

- Sprains and strains of the hamstring, quadriceps and groin muscles

Features

- Offered in six sizes, ranging from 8.25" to 10.375" in length

Part#	Thigh Circumference	Size
11141	17" - 19" (43 - 48 cm)	XS

11146	28" - 31" (71 - 79 cm)	XXL

Circumference taken at mid thigh.
Length increases with size from 8.25" - 10.375" (21 - 26 cm).
CE Marked

■ Knee Support

The Knee Support provides compression and warmth. Also available with additional padding over patella.

Common Examples of Use

- Mild knee sprains
- Chondromalacia
- Mild patellofemoral osteoarthritis
- Osgood-Schlatter disease

Features

- Available with additional padding over the front of the knee
- Open patella and open back options available

■ Calf Sleeve

The Breg Calf Sleeve provides warmth and compression. It is 12" in length, and is constructed from durable, 1/8" Neoprene. Its unique design allows it to be trimmed by 1" on the top and bottom.

Common Examples of Use

- Sprains and strains to calf

Features

- 12" (30 cm) length
- Can be trimmed by 1" on the top and bottom to 10" (25 cm) length
- Made from durable Neoprene material

Patellofemoral Bracing

Product Pictured (Left):

FreeRunner[®] Knee Brace

The FreeRunner[™] Knee Brace provides dynamic support for patellofemoral discomfort, including maltracking and subluxation. Its lateral buttress ensures proper patella tracking, while Smart-Zone[™] compression fabric offers lightweight, low-profile support with targeted compression.

FreeRunner® Knee Brace

The FreeRunner knee brace is the premier soft good for patellofemoral stabilization. It is designed for patients who have patellofemoral discomfort resulting from maltracking, subluxation or other patellofemoral injuries. It combines a patented offset CAM hinge for dynamic support and innovative Smart-Zone® compression fabrics, for a low profile and ultra lightweight silhouette. The difference in patellofemoral bracing is dynamic; now athletes and patients can focus on the game and not the brace.

Common Examples of Use

- Patella dislocation / subluxation
- Chronic patellar maltracking
- Patellar tendonitis
- Mild chondromalacia
- Runner's Knee
- Patellofemoral pain syndrome
- Post lateral release

Features

- Dynamic stabilization. Compression in full extension for support and relaxation in full flexion for unhindered ROM

- Smart-Zone compression fabric; moderate compression for anatomic support and light compression for a non-binding fit
- Lateral buttress with superior and inferior control strap for a personalized fit and stabilization
- Migration control with elastic banding and silicone strips
- Breathable and lightweight, just 7 oz
- Condyle pads for increased comfort
- A high strength and tear-resistant pocket system made of nylon hinges and foam hinge pockets

FreeSport® Knee Brace

FreeSport knee braces are innovative soft goods designed for mild to moderate patellofemoral support. They are constructed with the unique Smart-Zone® compression fabric that delivers a low profile and ultra-lightweight silhouette. They contain a lateral buttress that offers a comfortable and supportive fit and are available in both a sleeve and wraparound design. FreeSport braces provide compression and stability so patients can maintain their activities of choice.

Common Examples of Use

- Patellofemoral pain syndrome
- Patellar maltracking
- Patellar tendonitis
- Mild chondromalacia
- Runner's Knee
- Post lateral release

Features

- Smart-Zone compression fabric; moderate compression for anatomic support and light compression for a non-binding fit

- Lateral buttress with superior and inferior control strap for a personalized fit and stabilization
- Migration control with dual elastic banding and silicone strips
- Wrap-around design is universal Right / Left
- Breathable and lightweight
- A high strength and tear-resistant pocket system made of nylon hinges and foam hinge pockets

20.50 Design

The 20.50 is the only brace to provide maximum function in flexion. It uses an inflatable and adjustable bladder to dynamically support the patellofemoral joint as the knee moves between 20° and 50° of flexion. Increasing the pressure on the lateral border of the patella, during flexion, maintains normal tracking and reduces the risk of additional injury, subluxation or dislocation for severe patellofemoral joint conditions. Once past 50° and into deep flexion, the brace relaxes allowing a full range of motion. The 20.50 is lightweight, low profile and built to work with the body and not interfere with daily activities.

20.50 Patellofemoral Knee Brace

Specifically designed for patients with recurrent patella subluxations and dislocations, the buttress offers the most support between 20° and 50° of knee flexion. This dual upright brace comes prefabricated in a 12" (30 cm) magnesium frame, and can be customized to a 14" (36 cm) aluminum frame.

Common Examples of Use

- Injuries / Hereditary diseases to the soft tissues of the quadriceps complex
- Subluxations / Dislocations to the quadriceps complex

Features

- Dynamic design applies increased lateral pressure between 20° and 50° of knee flexion
- Pneumatic air bladder over a trimmable lateral buttress
- Lightweight magnesium
- Pneumatic patellar pad allows patients to adjust for their desired level of support
- Pivoting straps aid in preventing brace migration
- Quick-release buckles
- Up to 8° of load available on OA versions

PTO Soft Knee Brace (Patellar Tracking Orthosis)

The PTO is designed to align the knee for patients with maltracking or patella tracking conditions. The PTO adjusts the amount of compression applied from the lateral pressure plate by forming a soft tissue wall that controls patellar subluxation.

Common Examples of Use

- Mild chondromalacia
- Patella subluxation
- Patella dislocation
- Patella tendonitis
- Chronic patellar maltracking
- Patellofemoral pain syndrome
- Post-lateral release
- Post-patellar realignment

Features

- Available in Airmesh or Neoprene, shown in Airmesh
- Open back or closed back options available
- Dynamic function for normal gait
- Brace length is 13" (33 cm)

Airmesh, Left	Airmesh, Right	Airmesh, Open Back, Left	Airmesh, Open Back, Right	Neoprene, Left	Neoprene, Right	Thigh Circumference	Size

PTO High Performance Knee Brace

The PTO High Performance combines exceptional patellar tracking functionality with the added benefit of increased medial and lateral stability provided by aluminum hinge bars. This brace is ideal for active individuals and athletes.

Common Examples of Use

- Mild chondromalacia
- Patella subluxation
- Patella dislocation
- Patella tendonitis
- Chronic patellar maltracking
- Patellofemoral pain syndrome
- Post-lateral release
- Post-patellar realignment

Features

- Available in Airmesh
- Open back
- Aluminum high performance hinge bars
- Dynamic function for normal gait
- Removable hinge bars
- Brace length is 13" (33 cm)

■ Lateral Stabilizer with Hinge Soft Knee Brace

The Lateral Stabilizer with Hinge offers a strong tubular, lateral buttress for lateral stabilization of the patella and is commonly used by patients with patellofemoral conditions. The ultra low profile hinge helps address valgus movement.

Common Examples of Use

- Lateral patella subluxation
- Chronic patellar maltracking
- Mild chondromalacia

Features

- Available in Airmesh and Neoprene, shown in Airmesh
- Low profile design allows for improved patient compliance
- J-shaped buttress provides lateral patellar stabilization
- Inferior and superior straps provide additional compression

Hinged LPS

For moderate levels of activity, the Hinged LPS provides Lateral Patellar Support (LPS) as well as mild MCL and LCL support.

Common Examples of Use

- Strained knee ligaments
- Sprained knee ligaments
- Patella tracking support
- Mild MCL and LCL support

Features

- Low-profile polycentric hinges can be removed for laundering (extension stops available upon request)
- Removable and adjustable patellar buttress can be positioned and trimmed for multiple applications
- Lateral pull strap adds patellar support
- Mesh popliteal for patient comfort

Measure 6" (15 cm) above mid-patella while standing.

Tendon Compression Strap

The Tendon Compression Strap is designed to be low profile and help ease the inflammation of the patellar tendon. It can also be used on the arm to relieve the pain of tennis elbow or golfer's elbow.

Common Examples of Use

- Patellar tendonitis or commonly known as "Jumper's knee"
- Chondromalacia

Features

- Low profile, neoprene design
- Padded buttress for focused compression
- Padding under buckle

Circumference taken at joint line (distal to the patella).

■ Universal Horseshoe Knee Support

The Universal Horseshoe Knee Support provides compression and warmth. Its patella cutout and removable donut can provide patella control, while its unique designs allows it to be completely customizable to most patient anatomies.

Common Examples of Use

- Mild knee sprains
- Chondromalacia
- Mild patellofemoral osteoarthritis
- Osgood-Schlatter disease

Features

- Trimmable thigh and calf panels
- Repositionable hook patches
- Fits wide range of patient anatomies

VP40104-000	Universal Horseshoe Knee Support

■ Buttress Support, Open Back

The Buttress Support's 1/4" foam buttress can be positioned inside the Neoprene pocket to offer stabilization from virtually any position.

Common Examples of Use

- Patella tendonitis
- Patella subluxation
- Chronic patellar maltracking
- Mild chondromalacia

Features

- Stabilization from any position
- Medial and lateral stays help prevent migration
- Available with an open back

T Scope® Hip Brace

The T Scope Post-Op Hip Brace provides comfort and support for hip recovery. Featuring a telescoping design for a universal fit, a patented Range-of-Motion hinge for easy adjustments, and a one-handed waist compression system, it ensures a secure fit. Cushioned padding and thoughtful details, like hand protection for crutch users, enhance comfort and patient compliance.

Hip Bracing

T Scope® Post-Op Hip Brace

The Breg T Scope Post-Op Hip Brace delivers a patient-centric design for unprecedented comfort, simplicity and support during post-operative hip rehabilitation. Developed in conjunction with industry-leading physicians specializing in injuries, instabilities, and arthroscopic surgery of the hip, the T Scope Hip Brace incorporates Breg's premium and time-tested technologies. It features Breg's telescoping design for a fast, universal fit; the patented T Scope Range-of-Motion (ROM) hinge with quick-adjusting stops; a "Quick Lock" to lock out brace positions with the push of a button; and a unique waist compression lacing system that gives patients an easy one-handed pull for an intimate fit and additional back support. Padding throughout the brace and thoughtful details (like cushioned hand protection when using crutches) help ensure patient compliance.

Common Examples of Use

- Hip arthroscopy
- Femoroacetabular Impingement (FAI)
- Gluteus medius repairs
- Hamstring repairs
- Hip labral repair and resection
- Hip capsulotomy
- Loose / Foreign body removal
- Psoas release
- Microfracture procedures

Product Specs

- Small size fits waist sizes from 24" to 31" (61 - 79 cm); Regular size fits waist sizes from 31" to 60" (79 - 152 cm)
- Telescoping waist and thigh cuffs allow brace to fit patients from 5' to 6'4" (163 - 193 cm)
- Weighs 1.9 lbs (0.86 kg)
- Thigh strap will accommodate up to a 35" (89 cm) thigh circumference
- The Surgical Pad Kit, including Surgical Boots and Surgical Pillow, is available as part of the Full Kit or sold separately; these items are used both as part of the hip arthroscopy procedure and for post-operative rehabilitation

Features

- Easy-to-use ROM hinge with quick-adjusting flexion and extension stops
- Easy-to-use Quick Lock allows the brace to be locked out at -10°, 0°, 10°, 20° and 30° of hip flexion with the push of a button
- Stiff telescoping bars limit hip abduction and adduction (15° abduction built in)
- Semi-rigid cuffs to maintain control of the femur
- Telescoping waist and thigh sleeves for sizing a wide range of patients
- Removable waist belt that can double as an SI belt for back support following recovery
- Comfortable padding throughout the brace, including pads on the lateral (outside) side of the hinge and cuff to protect patient's hands while using crutches

Genesis 1.5 Walking Boot

The Genesis Walker is the lightest full-shell pneumatic walker available, expertly engineered for optimal strength without added weight. Featuring a dynamic air chamber in the heel, it absorbs shock at heel strike, similar to athletic shoes, ensuring a more comfortable walking experience.

Walking Boots, Ankle & Foot Bracing

WALKING BOOTS / ANKLE /
FOOT BRACING

Genesis Full Shell Walker

The Genesis Full Shell Walker is the lightest pneumatic walker of its kind on the market. It has been biomechanically engineered to provide strength where required while eliminating extra weight. Similar to popular athletic shoes, the Genesis Full Shell Walker uses a dynamic air chamber in the heel of the tread which actively absorbs the shock of heel strike and allows for a more comfortable walking experience.

Common Examples of Use

- Ankle sprains and strains
- Forefoot sprains
- Stable foot fractures
- Distal tibial fractures

Features

- Built-in air pump
- Durable hard shell design
- Ultra lightweight
- Low profile
- Trimmable shell
- Narrow heel width
- Dynamic air stride technology
- Dual air chambers
- Scalloped no-slip tread

■ ProGait® Plus

The ProGait Plus walker boot has all of the features and quality you have come to expect from Breg. The pneumatic quick-pump liner enhances patient comfort. The optional EZ Set Hinge allows for fast and easy range motion adjustments. The strong and durable aluminum shell has a thick foam innersole to cushion the foot.

Common Examples of Use

- Ankle sprains and strains
- Forefoot sprains
- Stable foot fractures
- Distal tibial fractures

Features

- Pneumatic quick-pump liner encompasses the forefoot, ankle, and leg for complete immobilization and increased patient comfort
- Push-button release
- Bulb placement prevents self-inflation, common with competitor models

Optional EZ Set Hinge
Easy-to-adjust hinge allows for range of motion. It can also be used to fix the foot in dorsiflexion or plantar flexion.

Optional EZ Set Hinge

ProGait

The ProGait is our classic walker boot. It has a strong and durable shell with thick foam innersole cushions for the foot. A full bootie encloses the foot, and it has pivoting forefoot straps and adjustable calf straps for ideal placement.

Common Examples of Use

- Ankle sprains and strains
- Forefoot sprains
- Stable foot fractures
- Distal tibial fractures

Features

- Basic breathable foam bootie
- Liner can be trimmed if needed

J Walker Plus / J Walker

The J Walker is an economical boot with all the basic features. The J Walker Plus includes a pneumatic quick-pump liner for enhanced patient comfort. Both boots are made of a strong, durable aluminum shell with a foam innersole that cushions the foot. A full bootie encloses the foot, and pivoting forefoot straps increase comfort.

Common Examples of Use

- Ankle sprains and strains
- Forefoot sprains
- Stable foot fractures
- Distal tibial fractures

Features

- Pneumatic quick-pump liner encompasses the forefoot, ankle, and leg for complete immobilization and increased patient comfort
- Push-button release
- Bulb placement prevents self-inflation, common with competitor models
- Liner can be trimmed if needed
- Available with Flatform insole

Achilles Boot

Two inches (5 cm) taller than our standard boot, the Hi Top boot, the Achilles boot's heel wedges place the foot in a plantar-flexed position using wedges in the heel. As the condition improves, wedges are removed, gently stretching the Achilles tendon and relieving tension on the tendon during rehab.

Common Examples of Use

- Immediate application following Achilles injury
- Reconstruction of Achilles tendon
- Sever's Disease

Features

- Includes four 10° heel wedges secured to the frame of the boot
- Calf cuff and forefoot pad design

Heel Wedges

Conformer / Charcot Conformer

The Conformer Diabetic Boot outperforms top contact casts in reducing pressure – 30% less peak pressure.* The technologically advanced Auto-mold™ foam holds shape to the buttress of the foot and prevents movement that can break down the skin.

Charcot Conformer is two inches (5 cm) taller than the standard Conformer and provides additional offloading of the foot with the use of a patella tendon bearing plate.

**Pollo, Fabian PhD, Brodsky, James MD, Crenshaw, Stephanie M.S., Kirksey, Chris B.S., "Plantar Pressures in Fiberglass Total Contact Casts vs. a New Diabetic Walking Boot" Foot and Ankle International, January 2003*

Common Examples of Use

- Sensate and non-sensate patients
- Ulcerative / pre-ulcerative conditions
- Diabetic patients
- Ankle joint instability
- Charcot

Features

- Dual density mid-sole foam promotes perimeter loading
- Molded inner liner encases the foot and lower leg
- Diabetic sock included

■ SoftGait Walker Boot Air

The SoftGait Walker Air is designed to promote a normal gait and a comfortable recovery experience. Its integrated air pump allows for quick and easy adjustments. Available in both tall and short versions and is offered in five sizes XS-XL.

Common Examples of Use

- Acute ankle sprains
- Swelling
- Soft tissue injuries
- Syndesmosis (high ankle) sprains
- Stress fracture of lower leg / ankle
- Forefoot / midfoot / hindfoot pain and injury
- Stable foot and / or stable ankle fractures
- Post ORIF and surgical stabilization
- Post tendon / ligament repairs
- Tarsal, metatarsal and phalange fractures
- Post bunion surgery, Achilles tendon ruptures and / or repairs

Features

- Integrated air pump and bladders
- Rigid uprights for security and stability
- Designed for smooth, natural gait
- Shockpod cushion for heel strike absorption
- Closed heel design for additional foot protection

■ Ultra Aurora™ Ankle Brace

Designed as a hybrid between the Ultra Zoom and High-5 ankle braces, the new Ultra Aurora Ankle Brace combines the comfort of the Performathane® ankle cuff with the stability and control of a rigid hinged footplate.

Common Examples of Use

- Prophylactic use
- Sub-acute ankle sprains
- Chronic ankle instability

Features

- Low profile Performathane soft shell
- Moldable, long foot plate
- Forms to ankle for more custom feel
- Universal left or right

■ Ultra Zoom® Ankle Brace

The Ultra Zoom Ankle Brace is one of the most advanced braces on the market for supporting the ankle joint. Made from revolutionary Performathane soft shell technology, the Ultra Zoom provides the perfect balance between comfort and support.

Common Examples of Use

- Sub-acute ankle sprains
- Chronic ankle instabilities
- Prophylactic use

Features

- Super low profile Performathane soft shell technology
- Provides balance between comfort and support
- Forms to ankle for enhanced comfort and protection
- Universal left or right
- Heat moldable shell

■ Ultra High-5® Ankle Brace

The Ultra High-5 Ankle Brace is innovatively designed using anti-rotation and anti-inversion support technology to help recover from high or low ankle injuries. The Ultra High-5 moves with your ankle, not against it, maintaining long term support through continued use.

Common Examples of Use

- High ankle sprains
- Sub-acute ankle sprains
- Chronic ankle instabilities
- Prophylactic use

Features

- Patented hinged-cuff technology restricts excessive twisting and turning
- Self molding foot plate enhances ankle control and comfort
- Lightweight, semi-rigid, heat moldable shell
- Bilateral free motion hinge
- Universal left or right

■ Ultra CTS® Ankle Brace

The Ultra CTS Ankle Brace is the first custom-treatment system that transforms from acute ankle brace to low profile activity brace – and back again. The new PerformaFit removable upright facilitates treatment and rehabilitation. Just attach the upright for acute injury and detach to return to activity. Comfortable Performathane technology custom forms to the injured ankle and constantly reforms with edema reduction.

Common Examples of Use

- High ankle sprains
- Acute ankle sprains
- Chronic ankle instabilities
- Tibia / Fibula stabilization
- Prophylactic use

Features

- Provides the perfect transition from a walking boot to an ankle brace for continued support
- Hinged-cuff technology restricts excessive inversion and rotation
- PerformaFit removable upright provides custom treatment
- Heat moldable footplate
- Universal left or right

Axiom Ankle

Rigid ankle foot orthosis provides low / high ankle protection and prevents inversion and eversion without inhibiting inversion mobility.

Common Examples of Use

- Inversion and eversion control
- Chronically unstable ankles
- Grade 1 and 2 acutely sprained ankles
- High ankle sprains
- Mild to moderate posterior tibial tendon dysfunctions (PTTD)

Features

- Anatomical design maintains ankle congruency and prevents pistoning
- Full foot plate eliminates pressure points
- Posterior calf adjustment fits a wide range of calf circumferences

WALKING BOOTS / ANKLE / FOOT BRACING

Hinged Wraptor

The Hinged Wraptor provides increased stability and support. The removable hinge system supports patient transition from acute injury to return to play. Bilateral hinges with rigid stirrup and footplate provide semi-rigid support without restricting plantar flexion or extension. The Hinged Wraptor fits left or right.

Common Examples of Use

- Chronic and acute ankle sprains
- Eversion and inversion control
- Protective sportswear

Features

- Detachable semi-rigid hinge
- Speed lace design
- Breathable spacermesh material
- Tibia and figure-8 strapping
- Anti-slip sharkskin padding
- Achilles padding

■ Wraptor Ankle Stabilizer

A premium lace up ankle brace utilizing figure 8 strapping design to mimic traditional taping without gapping. High ankle strap provides additional support and secures medial and lateral stirrup straps. Made with premium, durable materials.

Common Examples of Use

- Chronic and acute ankle sprains
- Abnormal eversion and inversion control
- Protective sportswear

Features

- Breathable Spacermesh lining wicks moisture away from the skin
- Sharkskin material at the base of the foot reduces brace slippage
- Latex-free Neoprene at the heel reduces irritation on the Achilles tendon

■ Lace Up Ankle Brace

The Lace Up Ankle Brace provides additional inversion and eversion control without compromising comfort. With its low profile design, durable construction and bilateral figure 8 strapping, the Lace Up Ankle Brace is a more durable alternative to athletic tape.

Common Examples of Use

- Sub-acute ankle sprains
- Chronic ankle instabilities
- Prophylactic use

Features

- Low profile
- Bilateral, figure 8 strapping
- Made of ballistic nylon
- Lace up design
- Breathable tongue
- Padding over Achilles tendon
- Fits either left or right ankle

Part #	Ankle Circumference	Size

■ Lace Up Ankle Brace with Stays

The Lace Up Ankle Brace with Stays provides additional inversion and eversion control without compromising comfort. With its low profile design, durable construction and bilateral figure 8 strapping, the Lace Up Ankle Brace with Stays is an excellent alternative to athletic tape.

Common Examples of Use

- Sub-acute ankle sprains
- Chronic ankle instabilities
- Prophylactic use

Features

- Designed to support and protect ankles
- Durable, non-stretch ballistic nylon with stays and elastic cuff closure
- Figure 8 strapping with heel lock eliminates taping
- Ultra low profile with seamless footbed
- Fits either left or right ankle

Part #	Ankle Circumference	Size

KoolAir Ankle Stirrup

The KoolAir Ankle Stirrup uses an air and gel bladder to provide rigid support and compression to support and protect patients with unstable or injured ankles. The KoolAir Ankle Stirrup Universal provides 9" of support to the ankle while the Regular provides 10" (25 cm) of support.

Common Examples of Use

- High ankle sprains
- Sub-acute ankle sprains
- Chronic ankle instabilities

Features

- Optional cold therapy
- Fits both left and right ankles
- Universally sized
- Adjustable heel pad

KoolAir Ankle with Valve

The KoolAir Ankle with Valve combines air and foam with a bladder that can be inflated to desired compression levels for maximum comfort. The KoolAir Ankle with Valve Universal provides 9" of support to the ankle while the Regular provides 10" (25 cm) of support.

Common Examples of Use

- High ankle sprains
- Sub-acute ankle sprains
- Chronic ankle instabilities

Features

- Bladder can be inflated to desired compression level
- Bladder combines air and foam for maximum patient comfort
- Re-engineered shell is lighter in weight but stronger, conforms to ankle with minimal bulk
- Anatomically contoured universal shell fits either left or right ankle
- Adjustable heel pad, vertical side straps and swivel straps provide easy application

11186	KoolAir Ankle w/ Valve (Regular)
11187	KoolAir Ankle w/ Valve (Universal)

■ Ankle Stirrup Plus and Ankle Stirrup

The Ankle Stirrup Plus provides rigid support with shells that support the ankle joint while allowing normal rehabilitation.

Common Examples of Use

- High ankle sprains
- Sub-acute ankle sprains
- Chronic ankle instabilities

97007	Ankle Stirrup Plus
97008	Ankle Stirrup

Features

- Ideal ankle stabilization for both acute and chronic ankle injuries
- Adjustable heel pad, vertical side straps and swivel straps provide easy application
- Lightweight shell conforms to the ankle with minimal bulk in the shoe
- Ankle Stirrup Plus designed with a foam liner (shown)
- Ankle Stirrup designed with a terry cloth liner
- Universally sized

■ Pullover Nylon Anklet

The Pull Over Nylon Anklet delivers stabilization and lightweight compression. It is designed with multidirectional stretch to accommodate a full range of anatomic movements.

Common Examples of Use

- Chronic ankle instabilities
- Prophylactic use

Part #	Ankle Circumference	Size
170903	7" - 9" (17 - 22 cm)	S

Plantar Fasciitis Soft Night Splint

The Plantar Fasciitis Soft Night Splint provides a consistent 90° angle stretch for nighttime support for patients with plantar fasciitis.

Common Examples of Use

- Plantar fasciitis
- Plantar flexion contracture
- Achilles tendonitis

Features

- Allows the patient to apply a consistent 90° angle stretch of the plantar fascia by holding the foot in the gentle dorsiflexion position
- Soft padded cover provides patient comfort and protection against irritation to the skin
- Neoprene free
- Removable foam wedge insert included
- Fits either the left or right foot

■ Cast Boot Flexible Sole

The Cast Boot Flexible Sole is made of durable canvas that provides protection of lower leg casts. It has a carpeted innersole to help reduce wear while the upper strap stretches for a comfortable fit.

Common Examples of Use

- Casted lower leg fractures

Features

- Heavy duty canvas
- Carpeted innersole to help reduce wear
- D-ring closure near the toe area for secure fit
- Upper strap stretches for a comfortable fit
- Slip resistant
- Hook and loop closure
- Fits either the left or right foot

Part #	Boot Length	Size
11392	9.375" (23 cm)	S

SA901009	13.5" (34 cm)	XL

Length measured from cast heel to toe.

■ Bunion Splint

The Bunion Splint helps maintain ideal hallux positioning and constant metatarsophalangeal alignment for patients with bunion discomfort.

Common Examples of Use

- Bunion management
- Hallux valgus post-op
- Hammer toe post-op

Features

- Constructed entirely of hook and loop materials for maximum application versatility
- Conforms to any foot contour
- Adjustable hallux positioning
- Thin, lightweight, and washable

Budin Splint

Budin Toe Splints help align toes with elastic bands that gently guide deformed toes into place. Encourages flexing and extension of toes to prevent fixation and rigidity.

Common Examples of Use

- Used to align crooked, overlapping or flexible hammer toes
- Ideal for post-op use

Features

- Soft, cotton-elastic band uses constant pressure
- Dual-layer foam padding cushions and protects ball of foot
- Fits easily into most shoes
- Washable and reusable

Ankle Foot Orthosis

The Ankle Foot Orthosis is a lightweight AFO intended to aid ambulation for patients who suffer mild to moderate neurological deficit resulting in foot drop. The anatomically correct shape will fit inside most lace-up shoes. It is made of a durable thermoplastic and may be custom fit and reshaped for individual comfort.

Common Examples of Use

- Foot drop
- Peripheral neuropathic disorders
- Post-surgical achilles tendon repair

Features

- Lightweight yet rigid support
- Easily modified with cast scissors and / or heat gun
- Fits in most shoes
- Universal, Right or Left

Adjustable Heel Lifts

The Adjustable Heel Lifts allow you to add up to 3/8" of lift, or peel away one or two layers to create a 1/4" or 1/8" lift. Resilient rubber layers maintain their corrective lift while still helping to absorb shock at heel strike.

Common Examples of Use

- Leg length discrepancy
- Plantar fasciitis
- Achilles tendonitis

Features

- Three easily removable layers to adjust height from 3/8" to 1/4" or 1/8"
- Excellent durability and patient comfort
- Non-slip construction

Common Examples of Use

- Post-surgical stabilization
- Cervical Disc Syndrome
- Cervical Stenosis
- Fracture management
- Sprains / Strains
- Decompressive procedures
- Cervicogenic headaches
- Radiculopathy
- Trauma / Whiplash

Features

- Mix and match front and back panels separately to accommodate unique anatomies
- Specially shaped peripheral support tabs increase surface contact area with ideal flexibility for comfort
- Antimicrobial cotton-hemp blend liners to help prevent skin irritation
- Ultra-breathable foam padding to reduce perspiration
- An extra set of pads to allow for continuity of care during pad cleaning

Note: To find the Cervical Sizing Guide, please contact Customer Care or visit the Ascend cervical product pages on www.breg.com.

Pinnacle LO 627 / 642

Breg's Pinnacle lumbar braces are designed for patients who want support throughout recovery and those who want a sleeker look as they return to daily activities.

Common Examples of Use

- Post-operative Support
- Fracture management
- Post Laminectomy Syndrome
- Spondylolisthesis
- Decompressive procedures
- Chronic Low Back Pain
- Deconditioned Trunk Musculature
- Spinal Stenosis
- Sprains / Strains
- Radiculopathy
- Spondylosis
- Bulging / Herniated Disc
- Degenerative Disc Disease
- Severe DJD
- Facet Syndrome
- IDET Procedures
- SI Dysfunction
- Sacroiliitis

Features

- Lightweight and breathable Airmesh padding
- Universal sizing that makes them easy to fit
- 3:1 mechanical advantage lacer system
- Dual-pull lacer system with independent top and bottom adjustment
- Ergonomic pull handles
- Super-soft, simulated suede for patient comfort and a polished aesthetic
- Cutout in back pad, eliminating irritation and allowing for easier access to incision site
- Repositionable lordosis pads (provided with brace)
- Easy-grip application strap

■ Pinnacle CTO and CTO4 Brace

The Pinnacle CTO and CTO4 models were developed to provide control through the cervical and thoracic regions. These braces help reduce movement in all three planes of motion - flexion/extension, lateral bending, and axial rotation.¹ The CTO & CTO4 are adjustable and provide multiple adjustment points to help ensure support at every step as well as patient comfort.

Common Examples of Use

- Post-surgical stabilization
- Cervicothoracic instabilities
- Fracture management

Features

- Flexible material zones that minimize pressure points
- Unique self centering sternal adjustment allows the brace to shape to each patient's anatomy
- Easy to adjust anterior thoracic plate
- Antimicrobial cotton-hemp blend liners to help prevent skin irritation
- An extra set of pads are included with each brace
- Ultra-breathable foam padding to reduce perspiration
- Intuitive, quick donning and doffing waist strap buckles

■ Carlsbad Cervical Collar

The Carlsbad Cervical Collar provides increased rigidity for maximum neck stabilization with unique adjustability and comfort. Its dual height adjustment saves time and storage space by accommodating various neck heights with one single product.

You will always have the right size on hand. The semi-rigid frame restricts flexion, extension and lateral bending. The brace liner is comfortable and reduces pressure at the chest, shoulders, jaw and back of the head.

Common Examples of Use

- Post-surgical Stabilization
- Cervical Disc Syndrome
- Cervical Stenosis
- Fracture Management
- Sprains / Strains
- Decompressive Procedures
- Cervicogenic Headaches
- Radiculopathy
- Trauma / Whiplash

Features

- Precision fit chin support
- Six size settings in one brace for reduced inventory, and half-size increments for individualized fit
- Modular thoracic extension
- Posterior extension for additional support
- Premium brace liner for comfort
- Dual adjustments for individualized fit
- Precision fit chin support

Cervical Collar with Open Trachea

The Cervical Collar with Open Trachea is constructed of two piece semi-rigid foam. It provides excellent immobilization while allowing anterior access to the neck. It is available in three heights for an intimate fit.

Common Examples of Use

- Immobilization of cervical spine

Features

- Reduces rotation and slightly hyperextends the cervical spine
- Provides rigid immobilization

- Excellent for emergency tracheotomies and quick access to the neck
- Molded and shaped to conform to any patient
- Constructed of lightweight closed cell foam material
- Hook and loop closure facilitates easy application and removal

Cervical Collar Low Density

The low density cervical collar provides comfortable support of the cervical spine. It is made of a 3" low density foam and covered in a stockinette. It contains a hook and loop closure and is available in multiple sizes to accommodate a wide range of patient sizes.

Common Examples of Use

- Mild cervical sprains
- Sprains
- Post-operative rehabilitation

Features

- Soft low density foam
- 3" (8 cm) height
- Hook and loop closure

■ Back Support with Side Pulls

Durable elastic construction with a unique compression molded lumbar pad provides excellent support. The additional side pulls allow for greater support and comfort.

Common Examples of Use

- Low back pain
- Low back sprains / strains
- Lumbar disc injury

Features

- Durable construction with side pulls for added support
- Compression molded lumbar pad

Shoulder Bracing

Product Pictured:

Arc® 2.0 Shoulder Sling

The ARC 2.0 Shoulder Sling offers personalized support for shoulder recovery with a moldable aluminum waistband that conforms to the torso, preventing forward shift. Its universal design fits both right and left shoulders, while breathable 2.0 material wicks moisture away for added comfort.

ARC® 2.0

The ARC 2.0 universal sling design folds to fit every patient with one brace - right or left, football player or gymnast. Our signature aluminum waistband is moldable to each patient's unique torso shape and prevents anterior migration that is common with shoulder braces. The ARC 2.0 features material that moves moisture away from the skin to another layer of fabric for quick evaporation.

Common Examples of Use

- For non-surgical or post-op shoulder conditions that require diagnosis-specific arm positioning
- Rotator cuff repairs
- Bankart lesions
- SLAP lesions
- Glenohumeral dislocations / subluxation
- Posterior / Anterior capsule repairs
- Shoulder instabilities
- Muscle and tendon repair
- Joint reconstruction

Features

- Brace positions include gunslinger, neutral plane and external rotation
- Universal sling design to fit every patient with one brace
- Unique pistol grip adjusts with quick-pull tabs and keeps the arm from migrating forward out of the sling
- Optional underarm strap relieves pressure on the neck for larger patients and patients positioned in external rotation
- One-hand buckles ease patient reapplication
- Cold therapy cutout in the sling

0° to Full Internal Rotation
Up to 70° External Rotation

Cold Therapy Cutout

ARC 2.0 With Pillow

Our signature ARC sling and material in a traditional pillow design. Universal sling design folds to fit every patient with one brace - right or left, from football player to gymnast. The unique material captures moisture and moves it away from the skin to another layer of fabric for quick evaporation, drying the skin four times faster than typical breathable materials.

Common Examples of Use

- For non-surgical or post-op shoulder conditions that require diagnosis-specific arm positioning
- Rotator cuff repairs
- Bankart lesions
- SLAP lesions
- Glenohumeral dislocations / subluxation
- Posterior / Anterior capsule repairs
- Shoulder instabilities
- Muscle and tendon repair
- Joint reconstruction

Features

- Universal sling design to fit every patient with one brace
- Traditional pillow design with 15° Abduction Pillow
- Unique pistol grip adjusts with quick-pull tabs and keeps the elbow seated in the sling preventing the hand from migrating forward out of the sling
- Optional underarm strap relieves pressure on the neck and reduces internal rotation
- One-hand buckles ease patient reapplication
- Cold therapy cutout in the sling

■ SlingShot® 3 Shoulder Brace

The SlingShot 3 is a clinician-driven innovation in shoulder bracing. Provides excellent comfort for the patient recovering from surgery while offering multiple options for post-operative support.

Common Examples of Use

- Rotator cuff repairs
- Bankart lesions
- SLAP lesions
- Glenohumeral dislocations / subluxation
- Posterior / Anterior capsule repairs
- Total shoulder reconstructions
- Global shoulder instability
- Soft tissue repairs / strains
- For non-surgical or post-op shoulder conditions that require diagnosis-specific arm positioning
- Muscle and tendon repair
- Joint reconstruction

Features

- Innovative offloading shoulder harness for patient comfort
- Convertible abduction pillow for post-operative options (15° abduction, 90° neutral and 45° neutral)
- Sling is comprised primarily of Airmesh® fabric for enhanced breathability
- Lined with a moisture wicking fabric for maximum comfort
- Quick release shoulder and waist straps
- Four sizes (S-XL)
- Universal left or right
- Includes exercise ball

Universal Deluxe Shoulder Sling

The Deluxe Shoulder Sling Universal is made from breathable cotton material that can be folded to the correct length for universal fit and support for most patients while maintaining the use of the thumb loop.

Common Examples of Use

- Shoulder injuries or instabilities
- Arthroscopic repair

Features

- Roll-back universal design
- Ultra-soft straps
- Butterfly pocket for easy application
- Front and rear strap adjustments
- Unique design to prevent D-ring rotation
- Breathable cotton material

Essential Shoulder Sling

Sized for a more precise fit, the Essential Shoulder Sling is made from ultra-breathable material to provide support to the shoulder, elbow and hand.

Common Examples of Use

- For non-surgical or post-op support
- Mild strains and sprains of the shoulder, elbow and forearm
- Arthroscopic repair
- Shoulder injuries or instabilities

Features

- Ultra-soft straps
- Closed pocket design
- Front strap adjustments
- Unique design to prevent D-ring rotation
- Ultra-breathable mesh material
- Available in universal design

■ Shoulder Stabilizer

Breg's Shoulder Stabilizer is a functional shoulder support designed to limit abduction and external rotation without sacrificing function. The unique design makes the Shoulder Stabilizer a preferred brace for football, hockey, and lacrosse players.

Common Examples of Use

- Shoulder dislocations
- Shoulder subluxations
- Global shoulder instabilities

Features

- Lightweight and ventilated Neoprene harness
- Easy to fit harness and arm band
- Ability to restrict abduction and external rotation
- Universal left or right

Elbow and Wrist Bracing

Product Pictured:

Classic Wrist

The Classic Wrist Brace is crafted from lightweight, durable materials for optimal support and comfort. Its design features a thin web space area to enhance patient comfort while maintaining full MP joint function. The brace is available in five sizes and can also be purchased with a thumb spica for additional support.

T Scope® Elbow Premier Brace

The T Scope Elbow Premier is designed for fixed or controlled range of motion in the treatment of ligamentous injuries and stable fractures of the elbow or upper arm. This brace incorporates the patented T Scope Premier hinge and telescoping uprights. Designed for exceptional patient fit and enhanced compliance, the T Scope Elbow Premier is one of the most lightweight, low profile post-op elbow braces on the market and features a quick lock to prevent flexion / extension at any angle. Malleable aluminum bars can be manipulated to accommodate patient swelling and post-operative bandages.

Common Examples of Use

- Stable fractures of the elbow, distal humerus, proximal radius or ulna
- Tendon and ligament injuries or repairs (Tommy John surgery, distal biceps tendon repair)
- Chronic elbow injuries
- Collateral ligament reconstructions
- Elbow hyperextension
- Range of motion control post injury
- Tennis elbow release
- Triceps tendon repair
- Lightweight - weighing only 13 oz makes it one of the lightest post-op elbow braces on the market
- Low-profile design conforms to the arm for greater patient comfort
- Telescoping forearm and humeral bars allows brace to fit a wide range of patient anatomies
- Trimmable pads and straps
- Malleable struts can be contoured to fit varying arm sizes and shapes
- Detachable shoulder strap is included
- Optional neutral hand accessory provides comfortable control to reduce pronation / supination
- Regular length telescoping forearm bar extends from 7.5" (20 cm) to 9.5" (24 cm)
- Long length telescoping forearm bar extends from 9.5" (24 cm) to 11.5" (29 cm)

Features

- Extension adjustability between -10° and 110°, while flexion may be adjusted between -10° and 120° (ROM control in 10° increments)

T Scope Elbow Accessory

Optional neutral hand accessory provides comfortable control to reduce pronation / supination. It is lightweight, low profile and does not require tools to apply.

Telescoping Elbow

The Telescoping Elbow meets all of your orthopedic elbow needs. The unique design reduces brace migration and maintains proper positioning, creating a comfortable environment to facilitate healing.

Common Examples of Use

- Non-surgical or post-op elbow procedures
- Stable fractures of distal humerus
- Stable fractures of proximal to middle radius or ulna
- Tendon and ligament repairs
- Controlled immobilization for sprains and strains

Features

- Malleable cuffs capture soft tissue and maintain hinge alignment
- Telescoping uprights for perfect fit
- Drop-lock mechanism for quick immobilization
- Optional shoulder strap included
- Optional supination / pronation hand attachment
- Optional neutral hand position attachment

Optional supination / pronation hand attachment

T-Chek

The T-Chek Elbow combines the features of a gutter splint elbow brace and a traditional elbow brace. The large malleable cuffs provide enhanced tissue capture for arms that need additional control. The optional wrist and hand attachments maintain the arm in a neutral position without the need of a hand grip. The unique design facilitates healing by reducing brace migration and maintaining proper positioning.

Common Examples of Use

- Stable fractures of the elbow, distal humerus, proximal radius or ulna
- ORIF medial epicondyle
- Tendon and ligament injuries or repairs, such as Tommy John surgery (Ulnar Collateral Ligament reconstruction)
- Chronic elbow injuries
- Collateral ligament reconstructions
- Elbow dislocation
- Tennis elbow release
- Triceps and biceps tendon repairs
- Lateral epicondylitis repair
- Controlled immobilization for sprains and strains
- Range of motion control post injury
- Post therapeutic injection treatments
- Soft tissue repair
- Pediatric fractures, such as supracondylar fracture

Features

- Protected range of motion can be set from -10° to 110° in 10° increments
- Large malleable cuffs act as gutter splint for enhanced tissue capture and maintaining hinge alignment
- Telescoping uprights for perfect fit
- Drop-lock mechanism for quick immobilization
- Optional shoulder strap included
- Optional supination / pronation hand attachment
- Optional neutral hand position attachment

X2K Elbow Brace

The X2K Elbow Brace is often used to support patients with medial and lateral ligament instabilities as well as elbow hyperextension. This is the ultimate brace for control, especially for high-contact sports.

Common Examples of Use

- Chronic elbow injuries
- Elbow hyperextension
- Elbow dislocations
- Range of motion control

Features

- High-performance, tempered aluminum (Aligns with the High Performance X2K Knee Brace)
- Ideal for high-contact activities
- Accommodates a wide array of patients due to the adjustable frame
- Polycentric hinge

HEX Elbow Brace

The HEX Elbow Brace controls range of motion and protects against hyperextension, making it the ideal brace for use during high-level activities. With its half-wrap bicep sleeve, the HEX is easy to apply and remove. The posterior straps prevent the brace from migrating, maximizing the product's effectiveness.

Common Examples of Use

- Hyperextension prevention
- Chronic elbow injuries
- Elbow tendonitis
- Post-elbow dislocations

Features

- Slip-on half-wrap bicep sleeve
- "X" anterior straps with strap-lock buckle
- Adjustable hinges to control desired ROM (0° - 40° extension / 45° - 90° flexion)
- Half Airmesh for breathability and half Neoprene for compression
- Additional elbow foam padding to protect olecranon process

Essentials Elbow Immobilizer

The Essentials Elbow Immobilizer is constructed of soft, durable foam with multiple rigid stays for secure immobilization.

Common Examples of Use

- Limp positioning
- Post-operative immobilization

Features

- Design for elbow immobilization
- Multiple stays for added rigidity
- Easy hook and loop closures

Part #	Circumference Range	Size
VP30605-010	2" - 3.75" (5.08 - 9.53 cm)	XS

VP30605-040	13" - 16.25" (33.02 - 41.27 cm)	L

Circumference taken at elbow joint.

Essential Elbow Sleeve with Compression Strap

Provides compression and warmth to the elbow joint. It features an additional forearm strap for focused support, if needed.

Common Examples of Use

- Elbow sprains
- Tendonitis
- Bursitis

Features

- All black design
- Optimized sizing and contour for more comfortable fit
- Forearm strap for added compression

Part #	Arm Measurement	Size
VP30603-020	8" - 9" (20 - 23 cm)	S

■ The Volley Tennis Elbow Strap

A versatile brace providing compression for the forearm. Includes both a gel pouch for targeted pressure and an air pouch for pneumatic compression.

Common Examples of Use

- Medial / lateral epicondylitis
- Generalized tendomyopathy

Features

- Includes gel pouch insert for cold therapy
- Air pouch insert for pneumatic compression
- Circumferential band is easy to apply
- Universal support fits either left or right

96501	The Volley Tennis Elbow Strap
-------	-------------------------------

Part #	Name	Forearm Circumference
96501	The Volley	8" - 14" (20 - 36 cm)

VP30604-050	12" - 14" (30 - 36 cm)	XL

Circumference taken at widest part of forearm.

■ Universal Tennis Elbow Support

Universal design reduces inventory on hand.

Common Examples of Use

- Medial / lateral epicondylitis
- Generalized tendomyopathy

Features

- Foam pad to alleviate stress over the medial / lateral epicondyle
- Semi-rigid plate disperses pressure for even compression

SA208000 Universal Tennis Elbow Support, Universal

■ Apollo® Universal Wrist Brace 8" & 10"

Apollo braces are constructed of a soft and comfortable foam material. The Apollo Universal wrist brace fits the anatomies of most patients. The adjustable dual closure provides greater contour and an individual fit. The contoured palmar stay is malleable while the dorsal stay can be positioned where desirable.

Common Examples of Use

- Wrist immobilization
- Sprains and strains
- Carpel tunnel syndrome
- De Quervain's syndrome
- Rheumatoid arthritis

Features

- Universal sizing for left and right
- Dual lacing closure provides greater contouring and support
- Designed to provide desired wrist and thumb support while allowing for maximum hand function
- Contoured palmar stay is malleable and the dorsal stay can be positioned as desired
- Available in 8" (20 cm) and 10" (25 cm) length

VersaFit Wrist Brace

The VersaFit Wrist utilizes a uniquely designed panel to accommodate a wide range of wrist sizes. It is made of soft, comfortable materials, and can easily be removed using its hook and loop closures.

Common Examples of Use

- Wrist sprains
- Tendonitis
- Soft tissue injuries
- Post cast support
- DeQuervain's tendonitis

Features

- Universal design to fit 80% of patients
- Malleable stays for adjustable positioning
- Available with thumb spica
- Has XS and XL sizes for outlier patient sizing

Universal Wrist Lacer

Universally-sized wrist brace reduces typical inventory from 5 to 1. Ideal for facilities with limited space.

Common Examples of Use

- Immobilization and support of the wrist
- Carpal tunnel syndrome
- Rehab and post-cast support
- Tendonitis

Features

- Adjust size with removable dorsal stay
- Palmar pad for increased patient comfort and fit
- Malleable and removable palmar stay for customized angulations
- Adjustable thumb cutout for better fit

Wrist Lacer 8" & 10"

The Wrist Lacer is constructed of durable, perforated suede and moisture wicking polypropylene felt. Its single-pull lace closure and adjustable thumb strap enhance ease of application and patient fit. The Wrist Lacer has a removable, malleable palmar stay that supports the wrist. The Wrist Lacer is available in 8" (20 cm) and 10" (25 cm) versions.

Common Examples of Use

- Sprains and strains
- Carpal tunnel syndrome
- Distal radial and ulnar fractures (10" (25 cm) version only)

Features

- Lightweight and durable construction
- Removable and malleable palmar stay
- Single-pull lace closure

Universal Wrist Splint 7.5" & 10.5"

The Universal Wrist Splint is universally sized to fit most patients. Its adjustable dorsal stay can be moved as needed to fit a wide range of wrist circumferences.

Common Examples of Use

- Sprains and strains
- Carpal tunnel syndrome
- Distal radial and ulnar fractures

Features

- Constructed of soft, comfortable foam
- Adjustable dorsal stay can be repositioned to fit most patients
- Available for left or right use
- 7.5" (19 cm) and 10.5" (26.67 cm) lengths

VP30001130	Universal Wrist Splint, 7.5" (19 cm), Left
VP30001230	Universal Wrist Splint, 7.5" (19 cm), Right

VP30001240	Universal Wrist Splint, 10.5" (26.67 cm), Right

Thumb Support

Lightweight, low-profile thumb support. It contains a malleable thumb support that provides a unique custom fit.

Common Examples of Use

- Sprains
- De Quervain's syndrome
- Tendonitis
- Hyperextension
- Arthritis

Features

- Three individual, removable stays
- Improved stay design from previous products
- Increased immobilization eliminates need for excess straps

Part #	Wrist Measurement	Size
VP30301-020	5" - 6.25" (13 - 16 cm)	S
VP30301-030	6.25" - 7.5" (16 - 19 cm)	M

■ Premier Thumb Splint with Stays

The Premier Thumb Splint with Stays is a versatile thumb splint made of perforated Neoprene. It features pockets on the radial, palmar and dorsal sides of the thumb and contains a malleable aluminum stay, a spiral stay and a rigid stay. These can be mixed and matched for desired directional support. The brace has a wraparound design making for an easy one-hand application.

Common Examples of Use

- Scaphoid injuries
- Carpal tunnel syndrome
- Gamekeeper's thumb
- De Quervain's syndrome
- Thumb arthritis and tendonitis

Features

- Interchangeable flexible and rigid stays help provide the desired support and comfort
- Universal design fits either left or right
- 1/8" perforated Neoprene wrap style is easy to apply

10201 Premier Thumb Splint with Stays (Universal)

■ Universal Thumb Spica

The Universal Thumb Spica has flexible and rigid stays to help provide support and comfort.

Common Examples of Use

- Sprains
- De Quervain's syndrome
- Tendonitis
- Hyperextension
- Arthritis

Features

- Interchangeable flexible and rigid stays help provide the desired support and comfort
- Universal design fits either left or right hand
- 1/8" perforated Neoprene wrap style is easy to apply

10202 Universal Thumb Spica

■ The Contender Boxer Splint

The Contender boxer splint provides positioning for fractures of injuries to metacarpals, phalanges, MCP, and PIP joints. The straps are adjustable for fit and comfort.

Common Examples of Use

- Fractures
- Metacarpal / Phalange injuries
- MCP joint injuries

Features

- Unique padded stay allows for easy adjustment and custom fitting
- Universal left and right
- Inventory optimization saves storage space:
 - Left Ulnar splint can be used as a Right Radial Gutter splint
 - Right Ulnar splint can be used as a Left Radial Gutter splint

Ascend® Pediatric Collar

The Ascend Pediatric Cervical Collar provides optimal comfort and stability for young patients during recovery. Made from breathable, anti-microbial materials, it supports skin health while securely cradling the neck to minimize discomfort. Available in multiple sizes, it offers versatile, high-quality support for a range of needs.

Pediatric Bracing

JET®

The JET knee brace is designed with children in mind. The shorter frame fits proportionally to a child's leg length, and the hinge has been reduced to match the anatomy of the smaller knee. The aircraft aluminum frame provides support, strength, and durability, while still remaining lightweight. Brace migration is prevented by contouring and capturing the medial condyle as well as using supracondylar suspension to keep the brace in place.

Spacer designed padding allows the brace to be adjusted to the growing child for longer use. By removing or stacking the spacers, a three-point load system can also be created, allowing the brace to be used for Juvenile Osteochondritis Dissecans (JOCD).

Common Examples of Use

- Ligamentous injuries to the ACL, PCL, MCL and LCL
- Meniscus
- Juvenile Osteochondritis Dissecans

Features

- 10" (25 cm) and 12" (30 cm) length frames
- S, M, L - 10" frame (25 cm)
- XL - 12" frame (30 cm)
- Reduced hinge size
- Condylar suspension points
- Spacer pads for size adjustments and unloading option

Deluxe Tri-Panel Knee Immobilizer

Designed to be adjustable for varying leg circumferences, the Deluxe Tri-Panel Knee Immobilizer features soft, breathable material and an adjustable popliteal pad for added comfort. Includes optional PCL strap.

Common Examples of Use

- ACL, PCL, MCL, LCL injuries
- Tibial plateau fractures
- Osteochondral repairs
- Meniscal repairs
- Patella tendon repairs
- Condylar fractures
- HTOs (High Tibial Osteotomy)
- Acute sprains / strains of the knee

Features

- Thick, adjustable popliteal padding
- Mesh, breathable interior
- Adjustable side panels
- Std. fits up to 25" (63 cm) thigh / XL fits up to 36" (91 cm) thigh

Pediatric Single Panel Knee Immobilizer

The Single Panel Knee Immobilizer is designed for quick application and immobilization. It is constructed of a comfortable and trimmable foam and features malleable and adjustable medial / lateral stays for support and customization. All straps contain the unique finger pull feature to enhance ease of use and aid in closure.

Common Examples of Use

- ACL, PCL, MCL, LCL injuries
- Osteochondral repairs
- Patella tendon repairs
- Condylar fractures
- HTOs (High Tibial Osteotomy)
- Acute sprains / strains of the knee

Features

- Trimmable foam laminate
- Multi-panel elastic straps for compression
- Easy pull finger pockets to enhance hook and loop closure
- Posterior rigid stays for additional support

Wee ROM® Post-Op

A post-op knee brace with telescoping bars to accommodate varying leg lengths.

Common Examples of Use

- Non-operative or post-op procedures to the lower leg
- ACL, PCL, MCL and LCL injuries
- Meniscus
- Cartilage
- Juvenile Osteochondritis Dissecans
- Patella injuries

Features

- Universal sizing
- Telescoping bars adjust from 16" - 22" (41 - 56 cm)
- Full range-of-motion hinge adjustable from 10° - 110°
- Extends to malleolus

■ Ascend Pediatric Collar

Breg's Ascend Pediatric collar comes in five pediatric sizes to accommodate a wide range of patients and anatomical differences.

Common Examples of Use

- Post-surgical stabilization
- Cervical Disc Syndrome
- Cervical Stenosis
- Fracture management
- Sprains / Strains
- Decompressive procedures
- Cervicogenic headaches
- Radiculopathy
- Trauma / Whiplash

Features

- Mix and match front and back panels separately to accommodate unique anatomies
- Specially shaped peripheral support tabs increase surface contact area with ideal flexibility for comfort
- Antimicrobial cotton-hemp blend liners to help prevent skin irritation
- Ultra-breathable foam padding to reduce perspiration
- An extra set of pads to allow for continuity of care during pad cleaning

Note: To find the Cervical Sizing Guide, please contact Customer Care or visit the Ascend cervical product pages on www.breg.com.

Essential Shoulder Sling

Sized for a more precise fit, the Essential Shoulder Sling is made from ultra-breathable material to provide support to the shoulder, elbow, and hand.

Common Examples of Use

- For non-surgical or post-op support
- Mild strains and sprains of the shoulder, elbow and forearm
- Arthroscopic repair
- Shoulder injuries or instabilities

Features

- Ultra-soft straps
- Closed pocket design
- Front strap adjustments
- Unique design to prevent D-ring rotation
- Ultra-breathable mesh material
- Available in Universal design

Measurement taken at waist.

■ Aluminum Push Button Crutches

Breg's axilla crutches are made from a lightweight aluminum with comfortable underarm pads and foam handgrips to aid in ambulation for lower extremity injuries or rehabilitation. Breg's crutches are available in youth, adult and tall options.

Common Examples of Use

- Aid in ambulation while recovering from surgical procedures or when one or both of the lower extremities is injured

Features

- Made of lightweight aluminum
- Comfortable EVA foam hand grips with underarm pads
- Rubber tip for increased traction
- Push button adjustment makes height changing easy
- Height adjustment in 1" (2.54 cm) increments
- Handgrip position is readily adjusted with wing nuts

Fracture Bracing and Splints

Product Pictured:

FastForm® Short Arm Multifunctional Orthosis (SAMO)

The revolutionary FastForm® Splint Cast Brace utilizes advanced technology featuring a highly flexible and biodegradable polymer, PolyTrexX™, paired with a fast-drying, moisture-wicking liner, DermaWick™.

FastForm® Technology

FastForm is revolutionary technology providing a reformable, adjustable, breathable, and waterproof solution for treatment of upper extremity fractures and injuries requiring stabilization. FastForm is radiolucent and provides a customized fit that is lightweight, easy to apply, and may be used in addition to or as an alternative to traditional casts or splints.

PolyTrexX Polymer

Features

- **Customizable:** PolytrexX technology allows clinicians to custom form to patient providing individualized fit, stabilization, and comfort.
- **Waterproof & Breathable:** The DermaWick liner wicks moisture away from skin and helps increase comfort with reduced odor or irritation.
- **SKU Management:** Two sizes fit most patients and allow for minimal stocking units. Product is packed flat to optimize shelf space.
- **Ease of Use:** Hinged design allows for easy removal and adjustability. Compliance straps also help deter removal prior to physicians approval.
- **Patient & Environmentally Conscious:** Not made with natural rubber latex and PolyTrexX is 85% biodegradable.

■ FastForm Short Arm Multifunctional Orthosis (SAMO)*

A multifunctional brace that helps provide support and protection for a variety of injuries to the wrist and forearm including distal radius or ulna fractures, acute injuries and post-operative care. Not made with natural rubber Latex.

Features & Benefits

- Thermoformable and easy to custom form to patients anatomy for a secure and comfortable fit
- Waterproof polymer with antimicrobial DermaWick liner that wicks moisture away from skin, dries quickly and minimizes odor
- Hinged design for ease of donning and doffing.
- Three sizes fit most patients and help minimize need for shelf space

Left, (EA)	Right, (EA)	Left, (6 / PK)	Right, (6 / PK)	Wrist Circ.	Forearm Circ.	Size

Measure wrist circumference (at ulna head), forearm circumference (at widest point).

FastForm Thumb Spica Multifunctional Orthosis (TSMO)

Provides stabilization to the first metacarpalphalangeal (MCP) and first carpometacarpal (CMC) joint as well as other injuries to the base of the thumb including Bennett's and Rolando's fractures. Also may be useful to aid with other fractures including navicular (scaphoid) and Colles or for post-operative stabilization. Not made with natural rubber latex.

Features & Benefits

- Thermoformable and easy to custom form to patients anatomy for a secure and comfortable fit
- Waterproof polymer with antimicrobial DermaWick liner that wicks moisture away from skin, dries quickly and minimizes odor
- Hinged design for ease of donning and doffing.
- Two sizes fit most patients and help minimize need for shelf space

Measure wrist circumference (at ulna head), forearm circumference (at widest point).

FastForm Universal Gutter Multifunctional Orthosis (UGMO)

Unique two-in-one gutter fracture brace that helps provide stabilization to fractures and injuries to metacarpal bones and joints on either side of the hand including Boxer's and Radial Gutter Fractures, metacarpalphalangeal (MCP) joints, and wrist the joint. Not made with natural rubber latex.

Features & Benefits

- One brace for radial and ulnar gutter injuries, fits right or left hand
- Thermoformable and easy to custom form to patients anatomy for a secure and comfortable fit
- Waterproof polymer with antimicrobial DermaWick liner that wicks moisture away from skin, dries quickly and minimizes odor
- Hinged design for ease of donning and doffing.
- Two sizes fit most patients and help minimize need for shelf space

Circumference taken along MP joint.

FastForm Versi-Sheet*

Versi-Sheets are a blank canvas combination of the PolytrexX shell and DermaWick liner. They can be molded, trimmed and formed to meet specific needs. When heated, PolyTrexX material can be fused together. For example, a Versi-Sheet can be gently kneaded to another FastForm brace when heated to extend the length of the existing product.

Common Examples of Use

- Customized care of injuries of the hand, wrist and forearm, including:
 - Fractures
 - Sprains and strains
 - Post-operative use
 - Cumulative trauma injuries
 - Pain management and tendonitis

Features

- Sheet design can be molded by clinician into any splint configuration

■ The Contender Boxer Splint

The Contender boxer splint provides positioning for fractures of injuries to metacarpals, phalanges, MCP, and PIP joints. The straps are adjustable for fit and comfort.

Common Examples of Use

- Fractures
- Metacarpal / Phalange injuries
- MCP joint injuries

Features

- Unique padded stay allows for easy adjustment and custom fitting
- Universal left and right
- Inventory optimization saves storage space:
 - Left Ulnar splint can be used as a Right Radial Gutter splint
 - Right Ulnar splint can be used as a Left Radial Gutter splint

ABD-M	18" - 20" (46 - 51 cm)	M
ABD-L	20" - 22" (51 - 56 cm)	L

Measurement taken at waist.

■ Metal Post Tib / Fib Splint

This leg splint is a coated, ventilated aluminum, pre-formed splint that provides immobilization of the lower leg.

Features

- Durable and flexible
- Fully ventilated for patient comfort
- Requires secondary bandage to hold splint in place

Part #	Product Height	Size
101603	12" (30 cm)	S
101604	14" (36 cm)	M
101605	17" (43 cm)	L

■ Carboplast® Rigid Insert

Carboplast Rigid Inserts reduce foot motion by making footwear rigid, without removing the sole.

Common Examples of Use

- Used to limit motion for conditions such as turf toe or hallux rigidus
- Inserts

Features

- Easy to fit and finish
- Customizable by heat molding or grinding
- Designed to retain shape
- Sold as a single, one per box

■ Synthocast Casting Tape

The Synthocast Casting Tape is comfortable and durable for every phase of immobilization. Its strong fiberglass construction is conformable, easy to wrap and provides a great fit for most patients.

Features

- Highly conformable casting tape
- Packaged in quantities of ten rolls per box

282903	Synthocast, 3" (8 cm) White
282904	Synthocast, 4" (10 cm) White

■ Thumb Spica Fracture Brace

The Thumb Spica is a lightweight, durable brace with a contoured design for full finger motion. The rigid exterior shell contains closed cell foam on the interior that provides gentle fluid compression for increased stability.

Features

- Adjustable hook and loop closures
- Heat moldable and can be trimmed

Left	Right	Width of Palm	Size
291243	291233	2.5" - 3" (6.5 - 8 cm)	S

290935	12" - 15" (30cm - 39cm)	L
290936	14" - 17" (36cm - 43cm)	XL

Measure bicep circumference.

■ Over the Shoulder Humeral Fracture Brace

The Over the Shoulder Humeral Fracture Brace offers full soft tissue contact. The deltoid extension provides greater alignment and prevents distal slippage. It has a rigid exterior shell and soft foam liner that provides gentle fluid compression for increased stability.

Features

- Adjustable hook and loop closures
- Heat moldable and can be trimmed
- Stockingette included

Part #	Bicep Circumference	Size
293903	8" - 11" (20cm - 28cm)	S
293904	10" - 13" (26cm - 33cm)	M
293905	12" - 15" (30cm - 39cm)	L
293906	14" - 17" (36cm - 43cm)	XL

Measure bicep circumference.

Ambulite Elbow Quick Splint

The Ambulite Elbow Quick Splint helps stabilize and decrease joint movement while providing injury support. This easy-to-apply splint is made of lightweight, breathable materials for added comfort.

Common Examples of Use

- Elbow immobilization
- Injury stabilization

Features

- Fits right or left elbow
- Adjustable flexion extension at the elbow
- Removable hand positioner

Part #	Forearm Length	Size
100192-010	12.5" - 14" (32 - 36 cm)	XS
100192-020	14" - 16" (36 - 41 cm)	S
100192-030	16" - 17" (41 - 43 cm)	M
100192-040	17" - 20" (43 - 51 cm)	L
100192-050	20+ (51+ cm)	XL

Formerly known as part numbers 202302, 202303, 202304, 202305 and 202306.

Hanging Cast Sling

This hanging sling for arm casts maintains correct healing position and adjusts to fit most patients. Easily detachable arm band makes it simple to remove and reapply, aiding in placement over or under clothing.

Common Examples of Use

- Fracture management of the humerus

Features

- Sling lies flat against the chest, reducing patient discomfort
- Web strap with adjustable buckle
- Foam padded collar and elastic support band

Part #	A = Desired Brace Length	Size
100349-005	<30" (<76 cm)	Ped
100349-020	30" - 42" (76 - 107 cm)	S
100349-030	40" - 52" (101 - 132 cm)	M
100349-040	50" - 62" (127 - 157.5 cm)	L
100349-050	60" - 72" (152 - 183 cm)	XL

Product in transition, formerly known as part numbers 301401, 301402, 301403, 301404 and 301405.

Measure the circumference around forearm, up around your neck and back down around your wrist (Point A) in inches.

AquaShield Half Arm

AquaShield Watertight Cast and Bandage Protectors are plastic protective covers for casts, bandages, dressings, burns, prostheses, and other conditions that must remain dry during bathing and showering.

Common Examples of Use

- Water proof protection for shower, bathing, pool or spa
- Commonly used for fractures, sprains, foot, hand and knee surgery, PICC sites, lymphadema therapy and water therapy

Features

- Pre-sized and ready to use
- Durable and safe
- High performance, heavy-gauge polyurethane

Breg Folding Walker

Breg's Folding Walker is made from lightweight aluminum for durability and easy handling. It features contoured vinyl hand grips for comfort, a two-button locking mechanism for stability, and an easy-fold design for quick storage and transport. Optional 5-inch fixed wheels allow smooth gliding over most surfaces, making it a versatile and convenient choice for daily mobility support.

Crutches, Canes and Walkers

Aluminum Push Button Crutches

Breg's axilla crutches are made from a lightweight aluminum with comfortable underarm pads and foam handgrips to aid in ambulation for lower extremity injuries or rehabilitation. Breg's crutches are available in youth, adult and tall options.

Common Examples of Use

- Aid in ambulation while recovering from surgical procedures or when one or both of the lower extremities is injured

Features

- Made of lightweight aluminum
- Comfortable EVA foam hand grips with underarm pads
- Rubber tip for increased traction
- Push button adjustment makes height changing easy
- Height adjustment in 1" (2.5 cm) increments
- Handgrip position is readily adjusted with wing nuts
- Maximum weight 300 lbs (136 kg).
- Fits users with heights from 5'2" to 6'6"

100309-000	Aluminum Push Button Crutches, Adult, 44" - 52" (112 - 132cm) length
100310-000	Aluminum Push Button Crutches, Tall, 52" - 60" (132 - 152cm) length
100311-000	Aluminum Push Button Crutches, Youth, 36" - 44" (91 - 112cm) length

Push Button Aluminum Cane

Breg's Push Button Cane is made from a lightweight aluminum with comfortable hand grips to help provide assistance with balance. The handle allows users to hook the cane over their arm while performing tasks.

Common Examples of Use

- Provides additional assistance with balance to help restore mobility

Features

- Made of lightweight aluminum
- Comfortable vinyl hand grips
- Rubber tip for increased traction
- Push button adjustment makes height changing easy
- Adult maximum weight capacity: 250 lbs (113kg).
- Adjusts from 30" to 39" (76 - 99cm)
- Fits users with heights from 4'5" to 6'5" (134 - 196 cm)

100314-000	Push Button Aluminum Cane
------------	---------------------------

■ Folding Walker

Breg's Folding Walker is made from lightweight aluminum with comfortable, contoured vinyl hand grips. The Folding Walker folds up easily so it can be taken anywhere you go. 5" (13cm) fixed wheels can be ordered as an accessory to help glide quietly over most surfaces.

Common Examples of Use

- Provides additional assistance with balance to help restore mobility

Features

- Made of lightweight aluminum
- Comfortable hand grips
- Push button adjustment makes height changing easy
- Adult maximum weight capacity: 265 lbs (120kg).
- Adjust from 32" to 39" (81 - 99cm)
- Fits users with heights from 5' to 6'5" (13 - 17cm)

■ Bariatric Walker

The Bariatric Walker is made of reinforced aluminum with a steel cross brace on each side to provide added stability. It has an extra wide frame with 22" (56cm) between the hand grips to keep larger patients active and mobile.

Common Examples of Use

- Provides additional assistance with balance to help restore mobility

Features

- Extra-wide frame gives larger patients a more comfortable fit
- Two-button folding capabilities let patients receive support through narrow spaces
- Comfortable hand grips
- 650 lb. (295 kg) weight capacity
- Approximate user height, 5'5" - 6'4" (14 - 17 cm); height adjustment width, 32" - 39" (81 cm - 99 cm); folded width, 4.5" (11 cm)

■ Overdoor Cervical Traction Kit

The Overdoor Traction Kit is used to relieve pressure on muscle and soft tissue surrounding the cervical spine. It is easily set up for home use.

Common Examples of Use

- Degenerative disc disease
- Sprains and strains of cervical spine

Features

- Overdoor bracket
- Padded head halter
- Water weight bag
- Traction cord

100187-000 Overdoor Cervical Traction Kit

■ Surgical Binder 8"

The Surgical Binder 8" provides support and compression to strained or weakened abdominal muscles.

Common Examples of Use

- Support and compression of abdominal muscles

Features

- Contourable closure for more comfortable fit
- White, soft elastic construction
- Trimmable material

Part #	Waist Measurement	Size
VP10110-030	24" - 44" (61 - 112 cm)	M

Formerly known as part numbers 146291, 146292, 146293, 146294 and 146299.

■ Pavlick Harness

The Pavlick Harness is designed with maximum comfort of the patient in mind. It doesn't have any bulky buckles, and the soft lining will help reduce the risk of skin irritation. It has been carefully engineered to comply with orthopedic standards.

Common Examples of Use

- Pediatric hip dysplasia

Features

- Color-coded straps to assist with proper application
- Soft liner for maximum comfort
- Anti-slip footpiece to prevent the foot from slipping out of the harness

Part #	Measurement	Month	Size
L1620-P	12" - 14" (30 - 36 cm)	-	Preemie

Measurements taken at chest circumference.

■ Compression Stockings

The compression stockings offer firm support and graduated compression to relieve tired, aching legs, moderate varicose veins or other related conditions throughout the day. Available in various sizes and open or closed toe for an individual "right sized" fit.

Common Examples of Use

- Therapeutic compression for minor swelling, tired aching legs moderate varicose veins

Features

- Knit construction with a defined heel pocket for added durability and proper fit
- Smooth opaque texture in neutral color
- Graduated compression, 20-30mmHg
- Sold as pair

Breg Information and Resources

Breg Information & Resources:

Breg provides essential resources for patients and providers, including the BregStore for online orders and BregPay for easy payments. Customize products through the Custom Logo Program and color options with detailed color charts. Customer Care offers support with orders, shipping, warranties, and returns, while QR codes link directly to product application videos for quick setup and guidance.

■ BregStore – Your Online Resource for 24/7 Order Placements

This is your one-stop shop for ordering, managing and tracking orders.

BregStore features include:

- Easy order placement
- Create order templates for frequently purchased product
- Real-time inventory checks and available substitutes
- Order tracking
- Order history
- Invoices

To register, visit <https://store.breg.com/>.

If you have questions please contact bregstore-partners@breg.com.

■ BregPay – Your Online Payment Portal

Our BregPay payment portal is a quick, easy way to review invoices and make payments on your account 24/7.

BregPay allows customers to:

- Easily pay invoices (both ACH and credit card payments)
- Easily locate past statements and invoices via the search tool
- Apply credit memos online
- Review payment history directly on the portal and via email
- Make “guest” payments – you don’t need to sign into your account to make a payment
- Self-registration

To access and register for BregPay, visit <https://www.breginvoiceportal.com/>.

■ To Our Customers

At Breg, we are committed to supporting our customers and their patients at every step of the health care journey. Each of our friendly Customer Care Representatives receives extensive training on all Breg products and practices, ensuring that you always get the best service possible. From our diverse line of medical devices to our exceptional staff, we strive to exceed your expectations.

Customer Care

Customer Care Representatives are available Monday through Friday, 6AM to 5PM, Pacific Time.
 Phone 800-321-0607 800-897-Breg (2734) International +1-760-795-5440
 Fax 800-329-2734 800-959-Breg (2734) International +1-760-795-5295

Your satisfaction is guaranteed

If, at any time, you are not completely satisfied with a Breg product within the designated warranty period, please contact our Customer Care Department, and give us the opportunity to make it right.

International

Not all braces listed in this catalog are available for international customers. Please consult your sales manager to verify availability in your region. CE Marked braces are indicated in the part number table for each product.

Shipping

We have two distribution centers, one in the West and one in the East, to provide prefabricated products to our customers as quickly as possible. We offer a full range of delivery services out of each distribution center from ground to overnight.

Off-the-Shelf Product Timelines

Assembled to Order / Special Product Requests: 5 business days
 Purchased to Order: 10 business days

To calculate your shipping timeline, use this URL: <https://status.breg.com/transit>

■ Track your package online.

Breg makes it easier than ever to receive real-time updates on the status of your order. Available on our website and at Status.Breg.com, the order tracking tool is available for all customers.

You simply need the customer account number and ONE of the following:

- PO number
- Order number
- Customer account billing zip code and a date range

And then you can:

- Review order status
- Track package delivery
- Verify shipping address
- See items associated with a specific order
- Identify backorder products
- and more

■ Warranty / Return Policy

Breg products come with a limited warranty against manufacturing and material defects.

- Breg does not warranty products for cosmetic deficiencies caused by regular use (normal wear and tear), intentional alteration, or misuse.
- Custom fabricated products or products with custom logos are returnable for manufacturing and material defects only.
- Non-warranty returns of unused products in saleable condition (including original packaging) will be accepted within 120 days from date of purchase and are subject to a 15% restocking fee and return shipping costs.

Product Return Restrictions

Due to regulatory and safety requirements, any product that has been used and determined not eligible for return, credit, or replacement will be disposed of, and no product will be returned to the customer.

Before returning a product, please contact our Customer Care department at 800.321.0607 or 800.897.BREG (2734) for warranty questions and/or to obtain a Returned Material Authorization (RMA) number. Only products approved for return will be accepted. Submission of a return request constitutes certification that the product meets all return eligibility requirements.

■ Breg Drop Shipment Policy

A \$15 "Drop Ship Fee" will be assessed to each order drop shipped by Breg directly to a patient/customer. An itemized Drop Ship Fee will automatically be applied to your invoice. A "drop shipment" is defined as any address outside of your identified stocking locations. New stocking locations must be set-up in advance to avoid being charged a Drop Ship Fee.

In the event of a manufacturing or material defect, the Drop Ship Fee will be credited on the original invoice. The replacement order will include the Drop Ship Fee. Drop Ship Fees will not be credited back for non-warranty returns.

Application Videos at Your Fingertips

Patients just scan the QR code with a Smartphone to view a video about the Breg product you prescribed. The videos show how to apply and care for the product, and also include tips and troubleshooting. Patients can also view the videos online by entering the QR code URL directly into an Internet browser.

Below we have included a few samples to scan for quick access; visit www.breg.com/qrcodes for a complete list.
