

# HORIZON™ 639 LSO

The Right Size for Every Body

Codes L0639 and L0651 Approved

The Horizon™ 639 LSO is Aspen's newest addition to the popular one-size adjustable Horizon line. Its innovative design delivers the benefits of added motion restriction in a low-profile brace that offers easy anterior entry. With coverage from the symphysis pubis to the xiphoid process along with overlapping anterior, lateral and posterior panels, the Horizon 639 LSO provides multiple layers of support around the entire torso for additional motion restriction in all three planes of motion.

### Customizable Xiphoid Extension

Designed to be easily modified, the xiphoid extension can be adjusted to contour and conform to varying anatomies. For shorter patients, it can be easily removed.

### Adjustable and Versatile Anterior Panel

Tall, rigid anterior panel provides added motion restriction and can be positioned for varying anatomies.

### Customizable Lateral Panels Ⓐ

Two lateral panels on either side provide increased lateral stability and reinforce motion restriction. Uniquely designed, these customizable panels can be trimmed down to a single panel for smaller patients or removed to support patient recovery.

### Modularity and Versatility in One Brace

The Horizon 639 LSO easily steps down to a Horizon 631 LSO and to a Horizon PRO (Pain Relief Orthosis), the lowest-profile option to help manage recurring back pain as needed.
